Background on Aexcel performance networks

As one of the oldest and largest insurers in America, Aetna has an obligation and an opportunity to transform health care. We believe a better health care system is more transparent and consumer friendly and also recognizes physicians for their efficient and effective use of health care resources. As the health care system transforms from fee-for-service payment models to outcomes, value-based payment models, demonstrating clinical quality and efficiency will be critical to increasing patient base and optimizing revenue for physicians.

Our Aexcel physician performance program is just one component of our network strategy. Aexcel is a designation for specialists who:

- are part of the broader Aetna network of participating providers
- have met certain clinical performance and efficiency standards

Aexcel originated from discussions with large employer groups who were challenged by rising health care costs. Patients, in turn, were becoming increasingly engaged as consumers of health care. As such, they wanted access to information about physicians to help them make informed health care decisions before seeking care from a physician.

Aexcel is implemented in 29 markets throughout the country; we make sure that affected physicians are aware of its introduction to their area beforehand. We also review the program with specialty societies and other groups within organized medicine. Our goal is to work collaboratively with providers to build sustainable models of health care that deliver better outcomes and lower overall costs. We believe that together with providers, we will help drive much-needed change to the quality, delivery and cost of health care in America.

We chose to address physician specialty care in developing this program for several reasons:

1. Specialty care is more episodic than primary care
2. Specialty care drives most of the advances in treatment, procedures, pharmaceuticals and diagnostic imaging, as well as the cost increases that accompany these advances
3. The following specialty categories chosen as part of Aexcel represent approximately 70 percent of specialty costs and control approximately 50 percent of our plan sponsors' total medical costs

How we evaluate physicians

The Aexcel designation process is normally conducted every two years and includes four key criteria:

- Volume
- Clinical performance
- Efficiency
- Network adequacy.

Case Volume

All physicians participating in Aetna's network are evaluated for clinical performance using 5 categories of clinical performance criteria. However, in order to be evaluated for claims-based clinical measures, each physician group must have at least 10 cases in one of the applicable claims-based measures or 30 case across the applicable claims-based measures.

For evaluation of efficiency, we identify specialists/groups currently participating in Aetna's network who have managed at least 20 episodes of care for Aetna members over the past 3 years.

Physicians must pass clinical performance criteria and have the minimum volume of episodes for efficiency to be considered for Aexcel designation.

Confidential and proprietary to Aetna, Inc.

06/01/2024

Clinical performance

The clinical performance evaluation process requires that a specialist or specialist group meet at least one of the 5 clinical performance criteria outlined below before they are evaluated for AEXCEL on the basis of efficiency.

Certification by external entity:

- At least 50% of specialists in the group have recognition from the National Committee for Quality Assurance (NCQA) for one of the programs below:
 - NCQA Recognition Programs
 - Diabetes (Provider Attestation)
 - Heart/Stroke (Provider Attestation)
 - PCMH (Patient-Centered Medical Home) Aetna Reported)
 - PCSP (Patient-Centered Specialty Practice) (Provider Attestation)

ABMS or AOA Performance-based Improvement Module:

- At least 50% of specialists in a group have completed the Performance Improvement Module (PIMs) activity, generally in combination with the maintenance of board certification, within the previous two years and on or after September 1, 2020 through September 1, 2022. If a physician's board does not identify a Performance Improvement Module, a physician may still be able to qualify by completing MOC Part 4 activity requirements within their specialty. MOC Part 4 activity is a practice improvement program specifically designated by the appropriate board.

Participation in the reporting to MIPS either through a registry or directly, or participation in an Aetna Value Based Contract:

- An attestation to at least 50% of the specialists in a group have completed participation in the Merit-based Incentive Payment System (MIPS) program as outlined by CMS for 2020, 2021, 2022. MIPS is a quality reporting program that encourages individual eligible professionals (EPs) and group practices to report information on the quality of care for their Medicare population.
- Participation in a Value Based Contract (VBC) with Aetna. Value Based Contracts include quality measures with incentives to improve or reach targets. The VBC quality measures include those measures already being used elsewhere in Aetna's PQ program. Aetna VBC arrangements that qualify included:
 1. Accountable Care Organization (ACO): An ACO is accountable for the quality of care for a defined population. Payment strategy encourages efficiency and quality care improvement and includes a robust set of efficiency and clinical quality measures.

2. Patient-Centered Medical Home (PCMH): A PCMH encourages physicians to transform their practice to center around the patient, and rewards physicians who perform well on a set of cost and quality metrics for attributed patients.
3. Bundled Payments: This program defines pay for care at an episode level and encourages coordination across health providers and hospitals.
4. Pay for Performance: This program is a value-based solution that is performance-based. It supports physicians as they move up the value chain or maintain high cost/quality performance.

Alignment with Aetna Institutes of Quality® (IOQ)

- At least 75% of specialists in a group have maintained an active medical staff appointment at an Aetna Institutes of Quality (IOQ) facility for bariatric surgery, cardiac or orthopedic care. The primary specialty of the physician has to be the specialty for which the facility is recognized. IOQ is a designation for facilities that have demonstrated quality care based on measures of clinical performance and efficiency. Additional information about Aetna’s IOQ program can be found at www.aetna.com.

Claims-based measures

- Measures are created for each of the specialties listed below:

Cardiology	Neurosurgery	Surgery
Cardiothoracic Surgery	OB/GYN	Vascular Surgery
Otolaryngology	Orthopedics	Urology
Neurology	Plastic Surgery	Gastroenterology

The quality measures listed below includes the specialty attribution.

Measure	Description	Specialty attribution
30-day readmission rate - managing physician	This measure calculates the percentage of acute care inpatient hospitalizations followed by a subsequent acute care inpatient hospitalization within 30 days of the discharge date of the first hospitalization. This measure excludes readmissions that would have been expected based on the clinical nature of the case.	All specialties included in AEXCEL

Adverse event rate/acute inpatient hospitalization - managing physician	This measure calculates the percentage of acute care inpatient hospitalizations that include an identified undesirable (adverse) event during the hospitalization.	All specialties included in AEXCEL
Adverse event rate - outpatient procedure	The measure calculates, for members having selected outpatient procedures, the frequency of an adverse event within the 30 days after a procedure.	Gastroenterology, Obstetrics/Gynecology, Orthopedics, Otolaryngology, Plastic Surgery, Surgery, Urology
CDC: Hemoglobin A1c testing	This measure calculates the percentage of members age 18 to 75 with diabetes receiving annual HbA1c testing.	Cardiology, Gastroenterology, Obstetrics/Gynecology,
CDC: Hemoglobin A1c poor control (>9.0%)	This measure calculates the percentage of members age 18 to 75 with diabetes that demonstrate poor glycemic control, based on an HbA1c level greater than 9%.	Cardiology, Gastroenterology, Obstetrics/Gynecology
Kidney Health Evaluation for Patients With Diabetes	The percentage of members 18–85 years of age with diabetes (type 1 and type 2) who received a kidney health evaluation, defined by an estimated glomerular filtration rate and a urine albumin creatinine ratio , during the measurement year.	Cardiology, Gastroenterology, Obstetrics/Gynecology
CDC: Retinal eye exam	This measure calculates the percentage of members age 18 to 75 with diabetes receiving an annual retinal eye exam by an ophthalmologist or optometrist or had a negative eye exam for retinopathy in the prior year.	Cardiology, Gastroenterology, Obstetrics/Gynecology
CDC: Blood Pressure Control (<140/90 mm Hg)	The percentage of members aged 18 years to 75 years diagnosed with diabetes (type 1 or type 2) who most recent blood pressure taken in the measurement year is <140/90 mm Hg.	Cardiology, Gastroenterology, Obstetrics/Gynecology
Breast cancer screening	This measure calculates the percentage of women age 50 to 74 who had a mammogram to screen for breast cancer within the 27-month measurement timeframe.	Obstetrics/Gynecology
Cervical cancer screening	This measure calculates the percentage of women age 21 to 64 who had a Pap test to screen for cervical cancer within the 3-year measurement timeframe. For members ages 30-64 years old without cervical cancer screening in 3 years there is a second check for evidence of cervical cancer screening and HPV screening within the last 5 years.	Obstetrics/Gynecology
Controlling High Blood Pressure	The percentage of members aged 18 years to 85 years who had a diagnosis of hypertension (HTN) and whose BP was adequately controlled (<140/90 mm Hg) during the measurement year.	Cardiology, Obstetrics/Gynecology

Statin Therapy for Patients with Diabetes	The percentage of members aged 40 years to 75 years during the measurement year with diabetes who do not have clinical atherosclerotic cardiovascular disease (ASCVD) who met the following criteria. Two rates are reported: 1. <i>Received Statin Therapy</i> . Members who were dispensed at least one statin medication of any intensity during the measurement year. 2. <i>Statin Adherence 80%</i> . Members who remained on a statin medication of any intensity for at least 80% of the treatment period.	Cardiology, Gastroenterology
Statin Therapy for Patients with Cardiovascular Disease	The percentage of male members aged 21 years to 75 years and female members aged 40 years to 75 years during the measurement year, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and met the following criteria. The following rates are reported: 1. <i>Received Statin Therapy</i> . Members who were dispensed at least one high-intensity or moderate-intensity statin medication during the measurement year. 2. <i>Statin Adherence 80%</i> . Members who remained on a high-intensity or moderate-intensity statin medication for at least 80% of the treatment period.	Cardiology
Cesarean section rate in singleton low-risk deliveries	This measure calculates the percentage of members delivered by the Ob/Gyn doctor or group that do not have a high-risk medical indication requiring a cesarean delivery and deliver a term, singleton live birth in a vertex position by cesarean section.	Obstetrics/Gynecology

Application of claims-based measures

Step 1

Aetna participating physicians in a geographic market¹ who practice in the selected specialty (for example, all cardiologists in the Aetna network in Atlanta) are reviewed.

Physicians are rank ordered according to an overall index score. Index measures are based on established, evidence-based measures of clinical performance.

Each measure is case-mix adjusted as appropriate and a physician or physician group must have at least 10 cases in any given measure or 30 cases across their claims-based measures, for claims-based clinical performance measures evaluation. The denominator can represent unique members or events depending on the measure. In some measures, such as breast cancer screening, the denominator is members. In some measures, such as adverse event rate, the denominator is each event, and a member can have multiple events. Only scored measures are included in the index score; measures are weighted according to the number of eligible cases.

Step 2

We identify physicians with the lowest index scores. Physicians whose measured outcomes fall at or below the 4th percentile of the peer group are then reviewed further (Steps 3-6) and may be excluded from consideration for AEXCEL designation, unless other clinical criteria are met.

Step 3

For all physicians and physician groups as identified at or below the 4th percentile of their peer group, we calculate the probability that the total number of successes across all appropriate measures is less than or equal to the total number of observed successes for each physician or physician group. Our calculations are based on the multivariate binomial probability distribution. Thus, we calculate:

$$P_r \{ Y \leq x_1 + x_2 + \dots + x_k \}$$

Where $Y = X_1 + X_2 + \dots + X_k$ is the sum of k independent binomial random variables.

$$X_i, i = 1, 2, \dots, k \text{ denotes the } i^{\text{th}} \text{ summand with distribution } X_i \sim B_i(n_i, p_i);$$

$x_i, i = 1, 2, \dots, k$ denotes the number of successes observed for the i^{th} measure.

n_i denotes the number of cases for the i^{th} measure; and

p_i denotes the observed success rate of the peer group for the i^{th} measure.

The distribution of Y is given by the discrete convolution formula; namely,

$$P_r \{ Y \leq y \} = \sum_{z_1=0}^y \sum_{z_2=0}^{y-z_1} \dots \sum_{z_k=0}^{y-\sum_{j=1}^{k-1} z_j} P_r \{ Z_1 = z_1, Z_2 = z_2, \dots, Z_k = z_k \}$$

$$= \sum_{z_1=0}^{y-\sum_{j=1}^k z_j} \sum_{z_2=0} \cdots \sum_{z_k=0} P_r\{Z_1=z_1\} P_r\{Z_2=z_2\} \cdots P_r\{Z_k=z_k\}$$

where the last step follows by independence. For physicians and physician groups with a large number of cases and a large number of appropriate measures, $P_r \{ Y \leq x_1 + x_2 + \dots + x_k \}$ is estimated based on the normal approximation for binomial distribution; namely,

$$\begin{aligned} P_r \{ Y \leq y \} &= P_r \{ X_1 + X_2 + \dots + X_k \leq y \} \\ &\approx P_r \{ W_1 + W_2 + \dots + W_k \leq y \} \\ &= P_r \{ W \leq y \} \end{aligned}$$

where W_i , $i = 1, 2, \dots, k$ are normal distributed random variables with mean $n_i p_i$ and variance $n_i p_i (1 - p_i)$. Thus, W is normally distributed with mean $\sum_{i=1}^k n_i p_i$ and variance $\sum_{i=1}^k n_i p_i (1 - p_i)$. If this lower tailed probability is less than 0.05; the physician or physician group is excluded from AEXCEL designation.

Step 4

An Aetna medical director reviews measure detail reports of physicians remaining in the lowest group using available clinical data. Some cases have logical clinical explanations and are eliminated from the index score, allowing additional physicians to be considered for AEXCEL designation.

Step 5

Detailed clinical performance data for each measure is mailed to the physicians remaining in the lowest group. An Aetna medical director is available to discuss this data. Every physician has the opportunity to provide additional information for reconsideration. For example, a physician still has the opportunity to provide information about the use of NQF-endorsed health information technology.

Step 6

Physicians who meet the clinical performance standards are then evaluated on the efficiency of their care.

General terms and definitions for claims-based clinical performance measures

Current Procedure Terminology (CPT)

All references are to Current Procedure Terminology © 2016 American Medical Association. All rights reserved.

Pharmacy data integrity

When measures calculate the rate of medication used for a specific population, we require not only that the member have a pharmacy benefit plan in the given timeframe, but also that they have used their pharmacy benefit. We check this by looking for at least one claim for a prescription medication within the measurement timeframe.

Continuous enrollment

When a measure timeframe extends beyond the current measurement year, the member enrollment for the denominator population is checked first for the current 12 months of the assessment year. If the member does not have evidence of the required service (numerator positive indication of the service expected) and does not have the enrollment for the full timeframe of the measure, the member is dropped from the denominator. This is done to show the positive care the provider delivers in the current assessment year. For example, breast cancer screening allows 27 months to find the mammogram. We check first for continuous enrollment for current measurement year of 12 months. For members who have had a mammogram, the provider is given credit. For the remaining members without evidence of a mammogram, we check for a full 27 months of enrollment. If the member does not have the 27 months enrollment history, the member is dropped from the measure because there is not a full 27 months of claims to know if the member had the test or not. This approach varies from the HEDIS specification that requires the full 27 months enrollment for the membership considered for this measure.

Claims lag

We add three months to the end of the measurement timeframe to allow for medical claim lag. This ensures the majority of medical claims billed within the measure timeframe are included in our data. No lag is required for pharmacy claims because they are adjudicated in real-time.

Case mix adjustment

Case mix classifies data characteristics into similar groups. This allows a basis of comparison. We apply a case mix adjustment to each clinical performance measure, as appropriate. We consider variables for case mix adjustment in measures where we see variation in rates for members. Depending on the measure, this could include different age groups, different lines of business (commercial vs. Medicare) and/or different risk levels, if the variation is considered to be out of the physician's control. There are additional variables that are also considered and the particular mix depends on the specific measure. The expected value for all measures, except adverse event, is calculated based on the results of indirect standardization to create the case mix adjustment. The expected value for adverse event is calculated using regression analysis.

Medical case

Aetna medical case logic summarizes clinical events by linking or associating all of the claims sent for a member during the same treatment occurrence. All Aetna Data Warehouse claim and encounter details are run through medical case logic. All specialist and ancillary claims that are within the starting and ending dates of service for these cases are attached to the case. For inpatient cases, a room and board bill are required, based on the revenue code. A bill from a different facility would trigger a new case. An example would be a transfer to an acute care facility, skilled nursing, or rehabilitation facility.

Managing provider logic applied within medical case

Medical Case assigns a managing provider for each medical case from all the physician providers caring for the member during the inpatient stay or outpatient care. For surgical cases the surgeon that performed the major procedure is

assigned. If there are multiple procedures the procedure with the highest allowed amount drives the assignment of the managing provider. For medical cases the provider with the highest visit count is assigned.

HEDIS Events/Diagnoses: Each HEDIS measure technical specification has an **Events/Diagnoses** section that defines the member condition/s that qualify the member for the denominator of a measure. The Events/Diagnoses section may include ICD10 diagnoses (primary, and/or secondary), lab codes, pharmacy codes, and procedure codes that define the member's condition.

Clinical group definitions

UPG, or Aetna Procedure Groups, represent the grouping of similar CPT and ICD procedure codes that refer to specific procedures performed for similar pathophysiologic processes for the same organ system. Currently, there are over 95,000 procedure codes. These codes map into 191 internally defined procedure groups, or UPGs.

UDG, or Aetna Diagnosis Groups, represent a grouping of similar ICD diagnosis codes that refer to the same pathophysiologic process affecting the same organ system. Currently, there are over 86,000 diagnosis codes, which map into 198 diagnosis groups, or UDGs.

DRG, Diagnosis Related Group is an industry standard that the federal government originally devised. A DRG code is one of over 750 classifications of diagnoses and procedure-driven reasons for inpatient care, for which patients demonstrate similar resource consumption and length of stay patterns. We assign a DRG to each case, using DRG Grouper software. The codes we feed into the Grouper are arranged based on a clinical algorithm and service date basis. This delivers the most clinically appropriate DRG for the case.

IDRG, Internal Diagnostic Related Group is an aggregate of HCFA DRGs. The IDR logic is used in the medical case adverse event and length of stay modeling. It groups the DRGs into similar subsets, based on the member's critical path (clinical reason for hospitalization) and then into the IDR specialty for modeling.

ERG, Symmetry Episode Risk Groups® (ERGs®) predict current and future health care usage for individuals and groups by creating individual risk measures that incorporate episodes-of-care methodology, medical and pharmacy claims information and demographic variables.

Procedure tracking table:--There are performance measures, such as breast cancer screening, that are looking for a specific indication of a historic procedure. We have defined sets of procedures, such as bilateral mastectomy (that would exclude the member from needing a breast cancer screening). We identify these procedures in claims data and store the information in a table for future reference.

30-day Readmission Rate/Managing Physician

Measure Acronym:	Measure Category:
-------------------------	--------------------------

Description: This measure calculates the percentage of acute care inpatient hospitalizations followed by a subsequent acute care inpatient hospitalization within 30 days of the discharge date of the first hospitalization. This measure excludes readmissions that would have been expected based on the clinical nature of the case.

Aetna measure #100252: Aetna internally developed measure

Eligible population

Product lines	Commercial, Medicare.
Ages	Greater than or equal to 1 years of age at time of admission.
Continuous enrollment	During the month of the inpatient admission through the month after discharge
Measurement period	23-month denominator period and 24-month numerator period
Benefit	Medical

Administrative Specification

Denominator	<p>All primary acute inpatient cases that are relevant to the specialties core practice. The DRG reflects the most significant clinical reason for a Medical Case. A DRG subset is used to identify the most appropriate inpatient cases to be evaluated based on the provider's specialty (Appendix B).</p> <p>This measure excludes counting admissions in any of the following conditions:</p> <ul style="list-style-type: none"> • The age of the members is <1 year, • The length of stay of the primary admission is an outlier • The discharge status indicates the member expired, a transfer to an acute inpatient facility or discharge against medical advice. <p>The DRG on the case indicates transplant or maternity care</p>
Numerator	<p>Readmission is defined as the proportion of acute care inpatient hospitalizations followed by a subsequent acute care inpatient hospitalization within 1 to 30 days of the original discharge date. This measure excludes counting readmissions that would have been expected based on the clinical nature of the case such as elective surgery, delivery, chemotherapy, and acute injury that, by nature cannot be related to a previous admission. The readmission is counted based any of the following attributes:</p> <ul style="list-style-type: none"> • If the Managing Specialist is the same on both cases. • The Major Diagnostic Category of the DRG on the admission is the same on both cases (for example: cardiac, digestive, orthopedic) <p>The DRG on the second admission is considered a complication of the prior admission such as respiratory infection/pneumonia, septicemia, acute myocardial infarction, deep vein thrombophlebitis, gastrointestinal bleed, or cellulitis.</p>

Exclusions	<p>Exclude primary admissions that meet any of the following criteria:</p> <ul style="list-style-type: none"> Length of stay outliers. We calculate the 99th percentile threshold for length of stay based on Aetna's national database for each DRG for all inpatient stays. If the case is in the 99th percentile, the case is excluded from the expected calculation and the denominator for the provider. Admissions where the discharge status indicates the member expired, a transfer to an acute inpatient facility or discharge against medical advice: Expired, transfer to acute inpatient facility or against medical advice: .DC Status Codes: 02, 07, 61, 20, 21, 22, 23, 24, 25, 26, 29, 41, 42 The admission date occurs on the same day as the primary admission discharge date (assumes this is a transfer or planned care). The admission date and the primary admissions discharge date days difference =1 and discharge status on the primary admission is expired, transfer to acute inpatient facility or against medical advice (Table A): The admission is for elective surgery: where the DRG is surgical and the admit type is elective The admission is any admission type (elective, urgent or emergency) and the DRG indicates care that predictably follows the primary admission and represents appropriate care) that, by nature, cannot be related to a previous admission (Chemotherapy, Transplant, delivery, or an acute injury).
Case Mix	DRG

Adverse Event Rate/Acute Inpatient Hospitalization/Managing Physician

Measure Acronym: NA

Measure Category: Efficiency

Aetna measure #100256: Aetna internally developed measure, based on AHRQ/RAND specifications.

Description: This measure calculates the percentage of acute care inpatient hospitalizations that include an identified undesirable (adverse) event during the hospitalization.

Understanding Adverse Events

An adverse event is a negative, unanticipated consequence of care. Examples include a wound infection within an elective surgery case, hospital-acquired pneumonia, or deep vein thrombosis after hip replacement surgery. Medical case logic assigns an adverse event to a case if there is a diagnosis that has all of the following characteristics:

- The diagnosis is not Present on Admission (POA = N or U).
- The diagnosis is unlikely to be a coexisting condition.
- The diagnosis is unlikely to reflect the normal progression of the principal diagnosis.
- The diagnosis is logically consistent with the occurrence of an adverse event.

Modeling Adverse Events

Medical case obtains its original data from medical, pharmacy, and lab claims as well as member and provider data. When considering a case, we take into account factors that are not under the control of the provider that may have an impact on the likelihood of having an adverse event. Examples of patient specific factors that impact outcomes include age, gender, admission type (elective, emergency, transfer from another facility, etc.), and co morbidities (clinical conditions present at the time of hospital admission). A regression-based methodology is applied to the inpatient data to account and adjust for these patient specific factors. With this approach, adjusted expected rates are calculated. Expected rates are compared with observed rates. This comparison of observed to expected provides a valid measure of performance specific to the population of interest. And, since the calculated data has been adjusted for clinical and demographic factors, an equitable comparison can be made across providers.

Cases are grouped by DRG to align with provider practice specialties such as cardiology, cardiothoracic surgery, gastroenterology, and general surgery. Each group of DRG cases are modeled based on the specialty definition.

Each case is interrogated for secondary diagnosis codes that Aetna has targeted as representing a possible adverse event. The case is checked to see if it is an elective admission or an emergency admission. Due to the known instability of members admitted for urgent care, some adverse event diagnosis codes are only considered for elective admissions.

Some complications are anticipated, such as the member that has cardiac surgery but goes on to have a post-operative heart attack. This diagnosis code would not be counted as an adverse event. The exclusion logic organized by specialty model, excludes the count for adverse event diagnosis codes present in an admission, based on the IDRG of the case to avoid the inappropriate counting of complications that are unfortunate but anticipated.

Eligible Population:	
Product lines	Commercial, Medicare.
Ages	Age at inpatient admission greater than or equal to 1.
Continuous enrollment	Continuous medical enrollment from the hospitalization admission date through the discharge date. One day gaps are considered administrative and not counted.
Measurement period	24 Months.
Benefit	Medical.
Administrative Specification:	
Denominator	All acute inpatient cases that are relevant to the specialties core practice. The DRG reflects the most significant clinical reason for a Medical Case. A DRG subset is used to identify the most appropriate inpatient cases to be evaluated based on the provider's specialty (Appendix B)
Denominator exclusions	This measure excludes counting admissions in any of the following conditions: <ul style="list-style-type: none"> The age of the members is <1 year, The length of stay of the admission is an outlier
Numerator	The adverse events indicator is based on secondary diagnosis codes within the claims of a hospitalization using the Aetna's adverse event generic screen. The numerator is the adverse event count, based on the adverse events indicator on the denominator cases. Additionally, the observed adverse event rate can be compared to the expected adverse event rate for all the denominator cases.
Exclusions	Exclude admissions that are length of stay outliers. We calculate the 99 th percentile threshold for length of stay based on Aetna's national data base for each DRG for all inpatient stays. If the case is in the 99 th percentile, the case is excluded from the expected calculation and the denominator for the provider. Exclude from the adverse event count diagnosis codes that could indicate complications that are anticipated.

Provider attribution	This measure is evaluating specialists or specialist groups assigned as the managing specialist on medical case (Appendix A) with cardiology, cardiothoracic surgery, gastroenterology, neurosurgery, neurology, obstetrics/gynecology, orthopedic surgery, otolaryngology, plastic surgery, surgery, urology or vascular surgery specialty designation. For each member/physician/IP stay combination credit/no credit is given
Case mix adjustment	An adjusted average rate is generated and is expressed as the expected adverse event rate. Every case generates this expected or predicted probability. The expected value is calculated based on the results of case-mix regression modeling that take into account many clinical and demographic variables that include, but are not limited to age, gender, region, product, admission type, discharge status, co-existing condition and the DRG group. A p value is generated and applied if statistically significant.

Adverse Event Rate Outpatient Procedures

Measure Acronym:

Measure Category: Efficiency

Aetna measure #100320: Aetna internally developed measure, based on AHRQ/RAND specifications

Description: The measure calculates, for members having selected outpatient procedures, the frequency of an adverse event within the 30 days after a procedure.

Understanding Adverse Events

An adverse event is a negative, unanticipated consequence of care. Examples include a wound infection within an elective surgery case, hospital-acquired pneumonia, or deep vein thrombosis after hip replacement surgery. Medical case logic assigns an adverse event to a case if there is a diagnosis that has all of the following characteristics:

- The diagnosis is not Present on Admission (POA = N or U).
- The diagnosis is unlikely to be a coexisting condition.
- The diagnosis is unlikely to reflect the normal progression of the principal diagnosis.
- The diagnosis is logically consistent with the occurrence of an adverse event.

Modeling Adverse Events

Medical case obtains its original data from medical, pharmacy, and lab claims as well as member and provider data. When considering a case, we take into account factors that are not under the control of the provider that may have an impact on the likelihood of having an adverse event. Examples of patient specific factors that impact outcomes include age, gender, admission type (elective, emergency, transfer from another facility, etc.), and co morbidities (clinical conditions present at the time of hospital admission). A regression-based methodology is applied to the inpatient data to account and adjust for these patient specific factors. With this approach, adjusted expected rates are calculated. Expected rates are compared with observed rates. This comparison of observed to expected provides a valid measure of performance specific to the population of interest. And, since the calculated data has been adjusted for clinical and demographic factors, an equitable comparison can be made across providers.

Cases are grouped by DRG to align with provider practice specialties such as cardiology, cardiothoracic surgery, gastroenterology, and general surgery. Each group of DRG cases are modeled based on the specialty definition.

Each case is interrogated for secondary diagnosis codes that Aetna has targeted as representing a possible adverse event. The case is checked to see if it is an elective admission or an emergency admission. Due to the known instability of members admitted for urgent care, some adverse event diagnosis codes are only considered for elective admissions.

Some complications are anticipated, such as the member that has cardiac surgery but goes on to have a post-operative heart attack. This diagnosis code would not be counted as an adverse event. The exclusion logic organized by specialty model, excludes the count for adverse event diagnosis codes present in an admission, based on the IDRG of the case to avoid the inappropriate counting of complications that are unfortunate but anticipated.

Eligible Population:

Product lines	Commercial, Medicare.
Ages	Age at inpatient admission greater than or equal to 1.
Continuous enrollment	Medical continuous enrollment during the 7 days before the outpatient procedure through the 30 days after the procedure date. One day gaps are considered administrative and not counted.
Measurement period	Denominator 23 Months, Numerator 24 months
Benefit	Medical.

Administrative Specification:

Denominator	All selected outpatient procedures for each specialty: The Aetna procedure group (UPG) on an outpatient surgery case identifies the surgery performed. A subset of procedures is included based on the provider's specialty (Appendix B).
Denominator exclusions	This measure excludes counting admissions in any of the following conditions: <ul style="list-style-type: none"> The age of the members is <1 year, The length of stay of the admission is an outlier
Numerator	The adverse events indicator is based the existence of a claim-based adverse event diagnosis code from 0 to 30 days of the procedure depending on the adverse event rules for that procedure. The numerator is the adverse event count, based on the adverse events indicator on the denominator cases. Additionally, this observed adverse event rate can be compared to the expected adverse event rate for all the denominator cases.
Exclusions	<p>From the denominator procedures that meet and of the following:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Denied cases <input type="checkbox"/> Skin graft procedures with burn diagnosis. <p>From the adverse event count diagnosis codes that could indicate complications that are anticipated related to specific procedures: Procedure group/adverse event category.</p>
Provider attribution	This measure is evaluating specialists or specialist groups assigned as the managing specialist on medical case with gastroenterology, obstetrics/gynecology, otolaryngology, orthopedic surgery, plastic surgery, surgery, or urology specialty designation (Appendix A). For each member/physician/outpatient procedure combination credit/no credit is given.
Case mix adjustment	Clinical risk score of the member (Symmetry ERG risk score includes evidence of co-morbid conditions) and procedure group of the case.

CDC: HbA1c Testing

Measure Acronym: CDC		Measure Category: <i>Effectiveness of Care/Diabetes</i>	
Description: The percentage of members aged 18 years to 75 years as of December 31 of the measurement year diagnosed with diabetes (type 1 or type 2) who had hemoglobin A1c testing performed.			
Administrative Specification:			
Denominator	Members aged 18 years to 75 years with diabetes (type 1 or type 2).		
Denominator exclusions	<p>Exclude members who meet any of the following criteria:</p> <ul style="list-style-type: none"> • Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following: <ul style="list-style-type: none"> – Enrolled in an Institutional SNP (I-SNP) any time during the measurement year. – Living long-term in an institution any time during the measurement year • Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded: <ul style="list-style-type: none"> – At least one claim/encounter for frailty – Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis • Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year. • Members in hospice or using hospice services • A dispensed dementia medication 		
Numerator	Members who had HbA1c test performed during the measurement year, as identified by claim/encounter or automated laboratory data.		
Product lines & Benefit	<p>Commercial, Medicare</p> <p>Medical during the measurement year.</p>		
Continuous enrollment & Allowable gap	<p>The measurement year of 12 months.</p> <p>No more than one gap in continuous enrollment of up to 45 days during each year of continuous enrollment.</p>		

Risk Adjustment: None

CDC HbA1c Poor Control >9%

Measure Acronym:
CDC

Measure Category:
Effectiveness of Care/Diabetes

Description:

The percentage of members aged 18 years to 75 years as of December 31 of the measurement year diagnosed with diabetes (type 1 or type 2) who had hemoglobin A1c testing performed and had result at level greater than 9%.

Administrative Specification:

Denominator

Members aged 18 years to 75 years with diabetes (type 1 or type 2).

Denominator exclusions

Exclude members who meet any of the following criteria:

- Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following:
 - Enrolled in an Institutional SNP (I-SNP) any time during the measurement year.
 - Living long-term in an institution any time during the measurement year
- Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded:
 - At least one claim/encounter for frailty
 - Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis
- Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year.
- Members in hospice or using hospice services
- A dispensed dementia medication

Numerator

Members whose most recent HbA1c level is >9.0% or is missing a result, or if an HbA1c test was not done during the measurement year. The member is not numerator compliant if the result for the most recent HbA1c test during the measurement year is ≤9.0%.

Product lines &	Commercial, Medicare
Benefit	Medical during the measurement year.
Continuous enrollment &	The measurement year of 12 months.
Allowable gap	No more than one gap in continuous enrollment of up to 45 days during each year of continuous enrollment.

Risk Adjustment: None
Managing Provider Attribution: C, G, OG
Data Collection Approach: Aetna claims data, measurement year plus 3 months runout

CDC Retinal Eye Exam

Measure Acronym: CDC		Measure Category: <i>Effectiveness of Care/Diabetes</i>
Description: The percentage of members aged 18 years to 75 years with diabetes (type 1 or type 2) who had eye exam performed.		
Administrative Specification:		
Denominator	Members aged 18 years to 75 years diagnosed with diabetes (type 1 or type 2).	
Denominator exclusions	<p>Exclude members who meet any of the following criteria:</p> <ul style="list-style-type: none"> • Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following: <ul style="list-style-type: none"> – Enrolled in an Institutional SNP (I-SNP) any time during the measurement year. – Living long-term in an institution any time during the measurement year • Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded: <ul style="list-style-type: none"> – At least one claim/encounter for frailty – Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis • Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year. • Members in hospice or using hospice services • A dispensed dementia medication 	
Numerator	<p>Members who had screening or monitoring for diabetic retinal disease by an eye care professional (optometrist or ophthalmologist) using:</p> <ul style="list-style-type: none"> • A retinal or dilated eye exam. • A negative retinal or dilated eye exam (negative for retinopathy) in the year prior to the measurement year. • Bilateral eye enucleation anytime during the member’s history to the measurement year. 	
Product lines & Benefit	Commercial, Medicare Medical during the measurement year.	
Continuous enrollment & Allowable gap	<p>The measurement year of 12 months.</p> <p>No more than one gap in continuous enrollment of up to 45 days during each year of continuous enrollment.</p>	

Risk Adjustment: None
Managing Provider Attribution: C, G, OG
Data Collection Approach: Aetna claims data, measurement year plus 3 months runout

CDC Blood Pressure Control (<140/90 mm Hg)

Measure Acronym: CDC	Measure Category: Effectiveness of Care/Diabetes
--------------------------------	--

Description: The percentage of members aged 18 years to 75 years diagnosed with diabetes (type 1 or type 2) who most recent blood pressure taken in the measurement year is <140/90 mm Hg.	
Administrative Specification:	
Denominator	Members aged 18 years to 75 years diagnosed with diabetes (type 1 or type 2).
Denominator exclusions	<p>Exclude members who meet any of the following criteria:</p> <ul style="list-style-type: none"> • Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following: <ul style="list-style-type: none"> – Enrolled in an Institutional SNP (I-SNP) any time during the measurement year. – Living long-term in an institution any time during the measurement year • Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded: <ul style="list-style-type: none"> – At least one claim/encounter for frailty – Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis • Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year. • Members in hospice or using hospice services • A dispensed dementia medication
Numerator	A member is numerator compliant if the BP is <140/90 mm Hg.
Product lines &	Medicare
Benefit	Medical during the measurement year.
Continuous enrollment &	The measurement year of 12 months.
Allowable gap	No more than one gap in continuous enrollment of up to 45 days during each year of continuous enrollment.

Breast Cancer Screening

Measure Acronym: BCS		Measure Category: Effectiveness of Care/Prevention & Screening	
Description: The percentage of women ages 50 years to 74 years who had a mammogram to screen for breast cancer.			
Administrative Specification:			
Denominator	Female members aged 52 years to 74 years as of December 31 of the measurement year.		
Denominator exclusions	<p>Exclude members who meet any of the following criteria:</p> <ul style="list-style-type: none"> • Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following: <ul style="list-style-type: none"> – Enrolled in an Institutional SNP (I-SNP) any time during the measurement year. – Living long-term in an institution any time during the measurement year • Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded: <ul style="list-style-type: none"> – At least one claim/encounter for frailty – Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis • Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year. • Members in hospice or using hospice services • A dispensed dementia medication • Bilateral mastectomy any time during the member’s history through December 31 of the measurement year 		
Numerator	Female members with one or more mammograms any time on or between two years prior to the measurement year.		
Product lines & Benefit	Commercial, Medicare Medical during the measurement year.		

Continuous enrollment &	October 1 two years prior to the measurement year through December 31 of the measurement year.
Allowable gap	No more than one gap in enrollment of up to 45 days for each full calendar year of continuous enrollment (i.e., the measurement year and the year prior to the measurement year).

Risk Adjustment: None
Managing Provider Attribution: OG
Data Collection Approach: Aetna claims data, measurement year plus 3 months runout
Population: Adults
Measure Type: Healthy

Cervical Cancer Screening

Measure Acronym: CCS	Measure Category: <i>Effectiveness of Care/Prevention & Screening</i>
--------------------------------	---

Description:
The percentage of women ages 21 years to 64 years who were screened for cervical cancer using either of the following criteria:

- Women ages 21 years to 64 years who had cervical cytology performed every 3 years.
- Women ages 30 years to 64 years who had cervical cytology/human papillomavirus (HPV) co-testing performed every 5 years.

Administrative Specification:

Denominator	Female members aged 21 years to 64 years.
Denominator exclusions	Exclude members who meet any of the following criteria: <ul style="list-style-type: none"> • Members in Hospice • Hysterectomy with no residual cervix, cervical agenesis or acquired absence of cervix any time during the member's history through December 31 of the measurement year
Numerator	Female members who were screened for cervical cancer using: <ul style="list-style-type: none"> • Women ages 21 years to 64 years who had cervical cytology performed every 3 years. • Women ages 30 years to 64 years who had cervical cytology/human papillomavirus (HPV) co-testing performed every 5 years.
Product lines &	Commercial
Benefit	Medical during the measurement year.
Continuous enrollment &	The measurement year of 12 months and 2 years prior to the measurement year.
Allowable gap	No more than one gap in enrollment of up to 45 days during each year of continuous enrollment.
Risk Adjustment: None	
Managing Provider Attribution: OG	

Data Collection Approach: Aetna claims data, measurement year plus 3 months runout
Population: Adults
Measure Type: Healthy

Controlling High Blood Pressure

Measure Acronym: CBP	Measure Category: <i>Medication Management and Care Coordination</i>
--------------------------------	--

Description: The percentage of members aged 18 years to 85 years who had a diagnosis of hypertension (HTN) and whose BP was adequately controlled (<140/90 mm Hg) during the measurement year.	
Administrative Specification:	
Denominator	Members aged 18 years to 85 years as of December 31 of the measurement year with a diagnosis of hypertension.
Denominator Exclusions	<p>Exclude members who meet any of the following criteria:</p> <ul style="list-style-type: none"> • Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following: <ul style="list-style-type: none"> – Enrolled in an Institutional SNP (I-SNP) any time during the measurement year. – Living long-term in an institution any time during the measurement year • Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded: <ul style="list-style-type: none"> – At least one claim/encounter for frailty – Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis • Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year. • Members in hospice or using hospice services • A dispensed dementia medication
Numerator	The member is numerator compliant if the BP is <140/90 mm Hg. The member is not compliant if the BP is ≥140/90 mm Hg.
Product lines & Benefit	Medicare

	Medical during the measurement year.
Continuous enrollment & Allowable gap	The measurement year of 12 months. No more than one gap in continuous enrollment of up to 45 days during the measurement year.
Risk Adjustment: None	
Managing Provider Attribution: C	
Data Collection Approach: Aetna claims data, measurement year plus 3 months runout	
Population: Adults	
Measure Type: Chronic/Other	

Statin Therapy for Patients with Diabetes

Measure Acronym:

SPD

Measure Category:

Effectiveness of Care/Diabetes

Description:

The percentage of members aged 40 years to 75 years during the measurement year with diabetes who do not have clinical atherosclerotic cardiovascular disease (ASCVD) who met the following criteria. Two rates are reported:

1. *Received Statin Therapy.* Members who were dispensed at least one statin medication of any intensity during the measurement year.
2. *Statin Adherence 80%.* Members who remained on a statin medication of any intensity for at least 80% of the treatment period.

Received Statin Therapy

Administrative Specification:

Denominator

Members aged 40 years to 75 years during the measurement year with diabetes who do not have clinical atherosclerotic cardiovascular disease (ASCVD)

Denominator exclusions

- Exclude members who meet any of the following criteria:
- Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following:
 - Enrolled in an Institutional SNP (I-SNP) any time during the measurement year.
 - Living long-term in an institution any time during the measurement year
 - Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded:
 - At least one claim/encounter for frailty
 - Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis
 - Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year.
 - Members in hospice or using hospice services
 - A dispensed dementia medication
 - Members with cardiovascular disease during the measurement year and year prior to measurement year
 - Pregnant members during the measurement year and year prior to the measurement year

	<ul style="list-style-type: none"> Members undergoing invitro fertilization during the measurement year and the year prior to the measurement year Members dispensed at least one prescription for clomiphene during the measurement year or year prior to the measurement year Members with ESRD during the measurement year and year prior to the measurement year Members with cirrhosis during the measurement year and year prior to the measurement year Members with myalgia, myositis, myopathy, or rhabdomyolysis during the measurement year
Numerator	Members who were dispensed at least one statin medication of any intensity during the measurement year.
Product lines & Benefit	Commercial, Medicare Medical, Pharmacy during the measurement year.
Continuous enrollment & Allowable gap	The measurement year of 12 months. No more than one gap in enrollment of up to 45 days during each year of continuous enrollment.

Statin Adherence of 80% Administrative Specification:	
Denominator	Members aged 40 years to 75 years during the measurement year with diabetes who do not have clinical atherosclerotic cardiovascular disease (ASCVD)
Denominator exclusions	<p>Exclude members who meet any of the following criteria:</p> <ul style="list-style-type: none"> Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following: <ul style="list-style-type: none"> Enrolled in an Institutional SNP (I-SNP) any time during the measurement year. Living long-term in an institution any time during the measurement year Members 66–80 years of age as of December 31 of the measurement year with frailty and advanced illness. Members must meet both of the following frailty and advanced illness criteria to be excluded: <ul style="list-style-type: none"> At least one claim/encounter for frailty Any of the following during the measurement year or the year prior to the measurement year (count services that occur over both years): At least two outpatient visits, observation visits, ED visits, nonacute inpatient encounters or nonacute inpatient discharges (instructions below) on different dates of service, with an advanced illness diagnosis

	<ul style="list-style-type: none"> Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year. Members in hospice or using hospice services A dispensed dementia medication Members with cardiovascular disease during the measurement year and year prior to measurement year Pregnant members during the measurement year and year prior to the measurement year Members undergoing invitro fertilization during the measurement year and the year prior to the measurement year Members dispensed at least one prescription for clomiphene during the measurement year or year prior to the measurement year Members with ESRD during the measurement year and year prior to the measurement year Members with cirrhosis during the measurement year and year prior to the measurement year <p>Members with myalgia, myositis, myopathy, or rhabdomyolysis during the measurement year</p>
Numerator	Members who remained on a statin medication of any intensity for at least 80% of the treatment period.
Product lines & Benefit	Commercial, Medicare Medical, Pharmacy during the measurement year.
Continuous enrollment & Allowable gap	The measurement year of 12 months. No more than one gap in enrollment of up to 45 days during each year of continuous enrollment.

Measure Name: Statin Therapy for Patients with Cardiovascular Disease	Measure Acronym: SPC	Measure Category: Effectiveness of Care/ Cardiovascular Conditions
---	--------------------------------	---

Description: The percentage of male members aged 21 years to 75 years and female members aged 40 years to 75 years during the measurement year, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and met the following criteria. The following rates are reported: 1. <i>Received Statin Therapy.</i> Members who were dispensed at least one high-intensity or moderate-intensity statin medication during the measurement year. 2. <i>Statin Adherence 80%.</i> Members who remained on a high-intensity or moderate-intensity statin medication for at least 80% of the treatment period.	
Received Statin Therapy & Statin Adherence of 80%	
Administrative Specification:	
Denominator	Male members aged 21 years to 75 years of age and female members aged 40 years to 75 years as of December 31 diagnosed with ASCVD.

Numerator	Members: 1) dispensed at least one high-intensity or moderate-intensity statin medication during the measurement year. 2) who remained on a high-intensity or moderate-intensity statin medication for at least 80% of the treatment period.
Product lines & Benefit	Commercial, Medicare Medical, Pharmacy during the measurement year.
Continuous enrollment & Allowable gap	The measurement year of 12 months. No more than one gap in enrollment of up to 45 days during each year of continuous enrollment.

Risk Adjustment: None	
Managing Provider Attribution**: FP, I, C, OG, N, E	
Data Collection Approach: Aetna claims data, measurement year plus 3 months runout	
<i>Statin Therapy for Patients With Cardiovascular Disease Measure Estrogen Agonists Medications List</i>	
Description	Prescription
Estrogen agonists	Clomiphene

<i>Statin Therapy for Patients With Cardiovascular Disease Measure High and Moderate-Intensity Statin Medications List</i>		
Description	Prescription	
High-intensity statin therapy	Atorvastatin 40–80 mg Amlodipine-atorvastatin 40–80 mg	Rosuvastatin 20–40 mg Simvastatin 80 mg Ezetimibe-simvastatin 80 mg
Moderate-intensity statin therapy	Atorvastatin 10–20 mg Amlodipine-atorvastatin 10–20 mg Rosuvastatin 5–10 mg Simvastatin 20–40 mg Ezetimibe-simvastatin 20–40 mg Niacin-simvastatin 20–40 mg	Pravastatin 40–80 mg Lovastatin 40 mg Fluvastatin XL 80 mg Fluvastatin 40 mg bid Pitavastatin 2–4 mg

Cesarean Section Rate in Singleton Low-risk Deliveries

Measure Acronym:	Measure Category:
<p>Description: This measure calculates the percentage of members delivered by the Ob/Gyn doctor or group that meet both of the following criteria:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Do not have a high risk medical indication requiring a Cesarean section <input type="checkbox"/> Deliver a term, singleton live birth in a vertex position by Cesarean section 	
<p>Based on indications of high risk and modified from The Joint Commission on the Accreditation of Healthcare Organizations (JCAHO) and endorsed by NQF. Measure specification reviewed by the Society for Maternal-Fetal Medicine (SMFM) and JCAHO. The American Journal of Obstetrics & Gynecology published the measure in a SMFM Special Report February 2016, titled <i>Comparing variation in hospital rates of cesarean delivery among low-risk women using 3 different measures</i>.</p>	
Eligible population	
Product lines	Commercial, Medicare.
Ages	All ages greater than or equal to 8 years.
Continuous enrollment	Member must be active as of the hospitalization admission date through the hospitalization discharge date within the 12 month assessment period.
Measurement period	12 Months
Benefit	Medical

Administrative Specification:

Denominator	Members that deliver a term, singleton live birth in a vertex position, without a medical indication of high risk, by Ob/Gyn doctor, excluding perinatologists.
Numerator	Members in the denominator that deliver by cesarean section.
Exclusions	Measure excludes members with an indication of high risk for a cesarean delivery, based on diagnosis codes within the delivery hospitalization (Appendix C) or delivered by a perinatologist.
Provider attribution	This measure is evaluating specialists or specialist groups assigned as the managing specialist on medical case (Appendix A) with, obstetrics/gynecology, excluding perinatologists, specialty designation. For each member/physician/IP stay combination credit/no credit is given
Case Mix	Risk adjustment has been applied by removing the high risk members from the denominator population (methods above).

Kidney Health Evaluation for Patients With Diabetes

Measure Acronym:

KED

Measure Category:

Effectiveness of Care/Prevention & Screening

Description:

The percentage of members 18–85 years of age with diabetes (type 1 and type 2) who received a kidney health evaluation, defined by an estimated glomerular filtration rate and a urine albumin creatinine ratio , during the measurement year

Administrative Specification:

Denominator

Diabetic members who are 18–85 years as of December 31 of the measurement year.

Denominator exclusions

- Members with ESRD.
- Members receiving hospice or palliative care.
- Members 66 years of age and older as of December 31 of the measurement year with frailty and advanced illness(must have both).
- Members must meet BOTH of the following frailty and advanced illness.
- Members 81 years of age and older as of December 31 of the measurement year with frailty during the measurement year.
- Medicare members 66 years of age and older as of December 31 of the measurement year who meet either of the following: Enrolled in an Institutional SNP (I-SNP) any time during the measurement year or Living long-term in an institution any time during the measurement year.
- Members who do not have a diagnosis of diabetes in any setting, during the measurement year or the year prior to the measurement year and who had a diagnosis of polycystic ovarian syndrome, gestational diabetes or steroid-induced diabetes, in any setting, during the measurement year or the year prior to the measurement year.

Numerator

Members who received both an estimated glomerular filtration rate and a urine albumin creatinine ratio during the measurement year on the same or different dates of service.

Product lines &

Commercial, Medicare

Benefit

Medical during the measurement year.

Continuous enrollment &	October 1 two years prior to the measurement year through December 31 of the measurement year.
Allowable gap	No more than one gap in enrollment of up to 45 days for each full calendar year of continuous enrollment (i.e., the measurement year and the year prior to the measurement year).

General statement on the Physician Efficiency

Episode of care (EOC) methodology

"Episode of care" is a methodology to assist in understanding medical cost and utilization drivers. An "episode of care" for a member represents treatment and service utilization across time for an identified health condition. The doctor, hospital, pharmacy, and ancillary testing, as well as other costs and utilization relating to an episode of illness, are rolled up into a single entity based on a specific condition. An episode of care spans from the onset of symptoms until treatment is complete.

Aetna uses Optum Symmetry® Episode Treatment Group® (ETG) software version 10.2 illness classification system to build episodes of care data in the Aetna Data Warehouse.

The ETG technology is distributed in the form of "grouper" software. The software accepts health care claims (service line detail) and returns the ETG value, along with other patient information. The grouper software rolls up all doctor, hospital, pharmacy, and ancillary testing claims data together to create episodes of illness or surgery that are clinically defined and identified by ETG codes for analysis purposes.

Symmetry ETGs as a measure of physician group efficiency

Symmetry's ETGs offer the ability to identify, quantify and compare the total medical costs of a clinically based episode of care spanning hospitalizations, ambulatory visits, and all ancillary services, including the use of pharmaceuticals. Medical claims and pharmacy claims are fed into the grouper software, and medical episodes are created from these claims.

Symmetry creates ETGs that categorize the episodes into different medical groupings. ETGs are attributed to a physician who is involved in a patient's care as demonstrated by that provider's claims detail within that episode. The physician who is attributed the episode is referred to as the "responsible provider." Aetna has developed the "responsible provider logic" that is used to assign an episode of care to a physician.

There are many variables that can affect the use of health care resources for a condition. There can be variation in resource use to treat a condition that is a direct result of the population differences or level of illness. To adjust for the variation in resource use, a case-mix-adjusted "expected allowed amount" is created for each ETG that is attributed to a physician group. That case-mix-adjusted expected allowed amount is then compared to the "actual allowed amount" for that episode of care.

The efficiency measure created for AEXCEL provides the ability to evaluate medical cost and utilization patterns among physicians treating similar, severity-adjusted illnesses. Providers are ranked in terms of resource efficiency after adjusting for differences in patient demographics and case mix, and then are compared to their peers. The peer group is defined as physicians of the same specialty in the same AEXCEL market or market type if volume is low.

There can be variation in efficiency indexes over time period analysis. Variation has been noted in physician groups whose episode counts over the given time period are low. To evaluate physicians and determine potential for variation, the statistical significance of a provider group's efficiency score is evaluated with a .10 significance level.

Aetna's provider attribution for Symmetry episodes of care

- Aetna attributes one responsible provider for each episode of care.
 - If an episode contains a surgical procedure as defined by Symmetry and it is also a major surgery as defined by Aetna, the episode is attributed to the physician who performed that procedure.
 - If there are 2 major surgeries, then the episode is attributed to the physician with the most allowed amounts

- If there is not a major surgery in the episode, but a minor surgery is found, the episode is attributed to the physician who performed the minor surgery.
 - If there are 2 minor surgeries, the episode is attributed to the physician with the most allowed amounts.
- If there is no surgery present, the episode is attributed to the physician with the highest number of visits based on management records as defined by symmetry
 - For physicians tied for highest number of visits, the episode is attributed to the physician with the most direct treatment provided.
 - If there is still more than one physician with the same amount of visits and treatments, the episode is attributed to the physician with the highest allowed amount.

Episode of Care Measure

Measure Acronym: EOC		Measure Category: Efficiency
Denominator	Denominator is the sum of the expected allowed amounts for the episodes being attributed to the group (Appendix D) . The expected allowed amount is the case mix adjusted average for each ETG and its combination of variables as described above.	
Number of episodes	The volume threshold for a provider/provider group to be considered for AEXCEL is a minimum of 20 episodes.	
Total Allowed \$	Episodes must be greater than \$0	
Denominator exclusions	All members => 65 year-old	
Numerator	Numerator is the sum of the actual allowed amounts for the same episodes in the denominator being attributed to the group	
Product lines & Benefit	Commercial Medical	

Provider attribution for AEXCEL specialties

AEXCEL uses the responsible provider of the episode for attribution but limits the ETGs used for evaluation of efficiency in the AEXCEL Network selection process. Each specialty has a specialty specific list of ETGs that are used in the evaluation process and they are limited to the ETGs that are most frequently attributed to that particular specialty (see [Appendix D](#)). For physicians with multiple AEXCEL specialties, they are assigned the appropriate specialty limited ETGs for each of their specialties listed in our provider data system. Upon request, Aetna will discuss with physicians more detailed information regarding the ETGs that were managed by the physicians.

Assigning specialty to a responsible provider with more than one specialty

There are many physicians who have more than one specialty and can manage cases associated with those specialties. Because of this, the assignment of the specialty to an episode should have clinical logic that assigns the most appropriate specialty to the episode of the condition the physician is managing. Clinical logic is applied such that it picks the most appropriate specialty for that condition where a physician has more than one specialty and that physician is assigned as the responsible provider of the episode of care.

Provider minimum episode volume

We identify those physicians who have managed at least 20 episodes of care within their specialty specific ETGs for Aetna members over the past 3 years. A reasonable volume of Aetna members is necessary to credibly measure performance.

Symmetry clean period

Each ETG has its own clean period. It is defined as the absence of treatment for a specified period of time. For example, ETG 438300 (Acute Bronchitis) has a 30 day clean period which means that any claims related to that diagnosis that fall within a 30 day period will be considered a recurrence of the same condition. When an episode is started for this ETG, all clinically consistent claims activity for acute bronchitis group to this episode until the point where 30 days passes without any corresponding clinically consistent treatment. If a claim for this condition is received after 30 days, a new episode is triggered. Only full year or complete episodes are used for AEXCEL. Complete episodes are those that met the clean periods before and after the measure or the episode lasted 365 days. Aetna limits chronic episodes (example, diabetes, congestive heart failure) to a maximum of 365 days.

Claims lag

There is a claims lag of three months used in the episodes of care measurement. When episodes of care are used for AEXCEL, we also apply a lag to allow for as many episodes to become complete or full-year episodes as possible for the measurement period.

Episode severity

Episode severity is a term used to describe the severity of a member’s condition. ETG methodology takes advantage of the relevant complication and comorbidity factors (indicating a sicker member who may require more extensive treatment for a related condition) when determining an episode’s severity. The result is a severity score and severity level for episodes. Typically, the higher the severity score, the more severe that condition is than for other members with a lower severity score for the same condition.

For example, if a member has an episode of diabetes and does not have complications or comorbidities associated with them it would be expected that this member’s severity score is relatively low. For a member with an episode of diabetes that has associated complications and comorbidities, it would be expected that this member’s severity score is higher. Severity adjusting episodes provides a powerful unit of analysis for comparing provider performance when different providers care for members with the same condition and different severity levels.

Aetna case mix adjustment

The case mix adjustment includes the following default variables:

Data Elements within each ETG	Values
AEXCEL Market	See Appendix E
ETG Condition	First 4 digits of the ETG Code
ETG Adjuster	The ETG Adjuster value for a given ETG based on the ETG group (See Appendix F)
Specialty	Specialty assigned to the episode

Age Group	Age group ranges: <ul style="list-style-type: none"> • Member age 0 to 20 • Member age 21to 49 • Member age 55 to 64 (Episodes with member's age 65 and greater are excluded from the efficiency measurement.)
Gender	Male or female
Year of Episode	Three rolling years based on episode start date beginning Jan 1, 2020 through Dec 31, 2022
Severity Level	As indicated on the episode based on Symmetry. (Values are 0 to 4)
Product	HMO , PPO .Indemnity
Pharmacy Usage	Whether or not the member has a pharmacy plan and has utilized the benefit: Yes or No (Adjusts whether there were dispenses within the episode using the pharmacy benefit)

All variables are evaluated yearly. The above variables are used in indirect standardization to create a grid of averages based on allowed dollars broken out by all of the above variables. If there are fewer than 22 episodes produced for any given combination cell² at the AEXCEL market level then the cell is too small to create a norm and we move from an AEXCEL market to a market type average allowed amount. The market type is a grouping of each market/specialty/MPC combination that has similar costs. If there continues to be less than 22 episodes produced in a combination cell at the market type, then a national average is created when there continues to be low volume at the market type level. If there are not at least 22 episodes at the national level, then the episode is considered an outlier.

For example, the following 7 members would each fall into a separate case mix category and produce a different peer average for the case mix:

ETG	Provider Specialty	AEXCEL Market	Age/Age Group	Gender	Pharmacy Benefit	Product	Year of Episode	Severity	Average Allowed Amount ³
386500100	Cardiology	Atlanta	18(0 - 20)	Male	Yes	PPO	2011	3	\$2,271
386500100	Cardiology	Atlanta	25(21-50)	Male	Yes	PPO	2011	3	\$2,308
386500100	Cardiology	Atlanta	60(51-64)	Male	Yes	PPO	2011	3	\$2,700
386500100	Cardiology	Atlanta	18(0 - 20)	Female	Yes	PPO	2011	3	\$2,100
386500100	Cardiology	Atlanta	25(21-50)	Female	Yes	PPO	2011	3	\$2,232
386500100	Cardiology	Atlanta	60(51-64)	Female	Yes	PPO	2011	3	\$2,552
386500100	Cardiology	Atlanta	18(0 - 20)	Male	Yes	HMO	2011	3	\$1,800
...

In the table above, the difference between the first three case mix categories is age. The fourth case mix category yields a difference in age between case mix categories two and three and a difference in gender from case mix category one. Each of these groups would be considered a different case mix category and would yield a different expected value. This applies for every variable combination that is encountered. Each combination of the case-mix variables produces their own expected value. This allows for a provider to be assessed while adjusting for the case-mix of the members he/she is treating, thus allowing for a more even playing field to be used when comparing one provider to another and to the specialty/market average for each ETG.

Aetna outlier logic

Outlier logic is applied at the case-mix category level as described above. When case-mix categories are created, the highest and lowest 5 percent of episodes within each case-mix category, based on the total cost, are considered outliers, and therefore excluded.

² A cell is the unique combination of: Market, Specialty, ETG Condition, ETG Adjuster, Pharmacy Usage, Year, Product, Age Cell, Gender and ETG Severity

³ Average allowed amounts in this chart are for illustration purposes only. They do not represent actual average allowed amounts.

Efficiency Measurement Specification

Provider grouping

The market identifies which providers are practicing as a group so their information is aggregated together. To accomplish this, provider data is sent to each region in the “AEXCEL Designation Model” for provider group selection. Provider groups can be either an individual or a group based on how individual providers conduct business. Provider groups are created by using either an individual PIN (EPDB Provider ID number), TIN (Tax ID), Group PIN (non-individual EPDB PIN associated with a group practice), risk group (provider group identifier), PORG (Provider Organization) or custom provider group within a distinct AEXCEL market.

Provider scoring

Scoring is done at the provider group level for volume. A provider group can include from 1 to many individual providers. Each provider group has the potential to be scored for efficiency, but they must meet the measure threshold of 20 or more episodes.

Each group meeting the 20 or more threshold is considered for designation as long as it passes at least 1 of the clinical performance measures. Each group will receive an observed (actual rate) to expected (case-mix-adjusted) ratio score. The expected value for this score is the case-mix-adjusted average allowed amount for each episode attributed to that group.

Statistical significance of efficiency index

Statistical significance is determined by using a weighted students t-test to compare each physician’s overall efficiency index to the peer group’s efficiency index as determined by indirect standardization of the episode index for each age, gender, chronic disease risk, pharmacy insurance coverage and utilization, year of episode, and insurance product type combination as shown above in the case mix adjustment section. Each physician/physician group is compared within specialty and market to the peer’s mean observed/expected index. The weights for each episodic observation are the expected dollars for the episode. All hypothesis tests are two-tailed and conducted at the 0.10 significance level. Physician/physician groups can be placed into 4 categories of statistical significance of efficiency:

- a. ESS/Significantly better
- b. NSS/No significant difference
- c. ISS/Significantly worse
- d. Low volume

Physicians whose results are efficient (lower cost relative to their peers) and statistically significant (ESS) during the measurement period for that AEXCEL designation cycle meet the efficiency criteria for AEXCEL participation.

Next, the AEXCEL network is further fortified with adding physicians until the network size is one where members have adequate access within an AEXCEL market. To be added back the following criteria is used:

- Their efficiency index is the closest to the mean index of the peer group
- They score statistically significantly higher (t-test) than the groups not selected.

Summary and detailed reports can be run for each physician, upon request, so physicians may see how their use of resources compares to their peers.

AEXCEL designation model process

The AEXCEL designation process includes four key criteria:

- Volume
- Clinical performance
- Efficiency
- Network adequacy

For specialists who meet the case volume and clinical performance standards for AEXCEL network designation, a measure of the efficiency of their care is developed and compared to their peers.

Designation process (performed by specialty in each market's designation model)

2. As described above, provider groups are assigned one of the following efficiencies/statistical significance types:
 - a. ESS/Significantly better
 - b. NSS/No significant difference
 - c. ISS/Significantly worse
 - d. Low volume
3. Provider groups are non-designated for AEXCEL, regardless of efficiency/statistical significance type if:
 - a. They do not pass at least 1 of the clinical measures, or
 - b. They are under investigation by the Special Investigation Unit.
4. Provider groups are moved from a non-designated to a designated status, regardless of efficiency/statistical significance type if they were not in a non-designated status in the preceding step, and if one of the following is true:
 - a. They are required to be included for contractual reasons
 - b. They perform unique services within the market
 - c. They are a multi-specialty group and the weighted average of all of their specialties as a whole are deemed to meet the efficiency and until the network size is one where members have adequate access to physicians within an AEXCEL market
5. After designation/non-designation, the eligible network for each market and specialty category is built by automatically including all physician groups that are ESS; however, additional providers can be added in, by add-in priority order, until the network size is sufficient to meet general access and penetration requirements (see note below regarding network adequacy). The add-in priority order is determined by rank ordering T-Test scores for all provider groups. By using the T-Test score, physicians are added back first whose efficiency index is closest to the mean and with statistical significance at the 0.10 level.
6. AEXCEL designation for networks based on 12 specialties (AP12):
 - Providers in 12 Specialties are evaluated against quality metrics and cost criteria
 - Those providers that pass the criteria are designated for Aexcel.
7. AEXCEL designation for networks including hospital tiering (AP20):
 - Hospital designations apply to AP20 networks.
 - Hospitals are evaluated against quality metrics and cost criteria. Local Network Management selects the hospitals to be used as Tier 1 facilities based on this criteria.
 - Providers who were designated for the 12 specialties are reviewed for designated hospital utilization. Those that meet the designated hospital utilization criteria will be used to create the Aexcel designated provider list for market review.

8. Aexcel adequacy - The AEXCEL designation model produces a baseline AEXCEL network based on the evaluation of volume, clinical performance, fraud flags and efficiency. Some physicians or physician groups may be included in the AEXCEL network based on contractual obligations. The network team completes the following steps to maintain sufficient network access to certain specialty care for AEXCEL members.
- a. Review the baseline network
 - b. Review the county coverage; the designation model identifies in which county each physician/physician group is located
 - c. If there are adequacy gaps, physicians/physician groups are evaluated and selected to fill those gaps. The selections are based on geographic access, ensuring the appropriate number of specialists within a geographic area*; member disruption, the anticipation that a significant number of Aetna members could be impacted by the physician or groups exclusion; and volume and efficiency measures. Some physicians may not have met the volume and/or efficiency criteria, but all add-backs must meet the clinical performance criteria.
 - d. Once completed, the network configuration is sent to MSU for geo access mapping. The process has been set up to map the 12 AEXCEL specialty categories into the model so that the county gaps identified are based on the AEXCEL specialties.
 - e. The underlying network configuration is not impacted by AEXCEL and it includes all other participating providers (any specialist not in the 12 AEXCEL specialty categories, primary care physicians, hospitals, and ancillary providers).

*The network geography mirrors the underlying Aetna medical plans, AEXCEL market defined access and state mandates for network adequacy.

Appendix D: Specialty ETG groupings

Allergist	
ETG 9.4 CD	Allergist ETG Description
403200000	Allergic rhinitis, w/o surgery
438800000	Asthma, w/o complication, w/o comorbidity
821100000	Environmental trauma
438800010	Asthma, w/o complication, with comorbidity
667800000	Other inflammation of skin, w/o complication, w/o comorbidity
403500010	Chronic sinusitis, with comorbidity, w/o surgery
403300000	Acute sinusitis, w/o surgery
438800110	Asthma, with complication, with comorbidity
403500000	Chronic sinusitis, w/o comorbidity, w/o surgery
438800100	Asthma, with complication, w/o comorbidity
667800010	Other inflammation of skin, w/o complication, with comorbidity
350400000	Conjunctivitis
403100000	Tonsillitis, adenoiditis or pharyngitis, w/o complication, w/o comorbidity, w/o surgery
405300000	Other disorders of ear/nose/throat, w/o surgery
439300010	Chronic obstructive pulmonary disease, w/o complication, with comorbidity, w/o surgery
130800110	Immunodeficiencies, with complication, with comorbidity
388100010	Hypertension, w/o complication, with comorbidity
473300010	Inflammation of esophagus, w/o complication, with comorbidity, w/o surgery
779200000	Non-routine inoculation
402900000	Otitis media, w/o complication, w/o comorbidity, w/o surgery
402900100	Otitis media, with complication, w/o comorbidity, w/o surgery
438300000	Acute bronchitis, w/o comorbidity
666900000	Psoriasis, w/o complication, w/o comorbidity
438300010	Acute bronchitis, with comorbidity
409900000	Otolaryngology diseases signs & symptoms
666700000	Acne
473300000	Inflammation of esophagus, w/o complication, w/o comorbidity, w/o surgery
475200010	Other inflammation of intestines & abdomen, w/o complication, with comorbidity, w/o surgery
669100000	Other skin disorders, w/o surgery
821000000	Late effects & late complications
668200101	Non-malignant neoplasm of skin, with complication, with surgery
388100000	Hypertension, w/o complication, w/o comorbidity
403100100	Tonsillitis, adenoiditis, or pharyngitis, with complication, w/o comorbidity, w/o surgery
667500000	Fungal skin infection
711700000	Autoimmune rheumatologic diseases, except lupus
163000010	Diabetes, w/o complication, with comorbidity, w/o surgery
475200000	Other inflammation of intestines & abdomen, w/o complication, w/o comorbidity, w/o surgery
479900000	Gastroenterology diseases signs & symptoms
404700000	Congenital & acquired anomalies of ear/nose/throat, w/o surgery
711400000	Adult rheumatoid arthritis, w/o complication, w/o comorbidity
316900000	Migraine headache, w/o complication, w/o comorbidity
476900000	Other diseases of intestines & abdomen, w/o surgery
130800100	Immunodeficiencies, with complication, w/o comorbidity
350300000	External eye infection, except conjunctivitis, w/o surgery
239800000	Anxiety disorder or phobias, w/o complication
667200000	Bacterial infection of skin, w/o complication, w/o comorbidity

669900000	Dermatological signs & symptoms
667300000	Viral skin infection
668200001	Non-malignant neoplasm of skin, w/o complication, with surgery
164800100	Obesity, with complication, w/o surgery
449900000	Pulmonology diseases signs & symptoms
130800010	Immunodeficiencies, w/o complication, with comorbidity
271600000	Other drug dependence, w/o comorbidity
130600010	Other infectious diseases, w/o complication, with comorbidity, w/o surgery
240600000	Other neuropsychological or behavioral disorders
238800000	Mood disorder, depressed, w/o complication, w/o comorbidity
240100000	Attention deficit dis, w/o complication
437400010	Bacterial lung infections, w/o complication, with comorbidity
439300110	Chronic obstructive pulmonary disease, with complication, with comorbidity, w/o surgery
476400000	Irritable bowel syndrome
388100110	Hypertension, with complication, with comorbidity
239800100	Anxiety disorder or phobias, with complication
667200010	Bacterial infection of skin, w/o complication, with comorbidity
712208010	Joint degeneration, localized - back, w/o complication, with comorbidity, w/o surgery
437200010	Viral pneumonia, with comorbidity
130800000	Immunodeficiencies, w/o complication, w/o comorbidity
318600000	Other neurological diseases, w/o surgery
164500010	Nutritional deficiency, with comorbidity, w/o surgery
404900000	Hearing disorders, w/o surgery
711600000	Lupus, w/o comorbidity
238800010	Mood disorder, depressed, w/o complication, with comorbidity
405300001	Other disorders of ear/nose/throat, with surgery
403700000	Other infections of ear/nose/throat, w/o surgery
208900000	Other hematologic diseases, w/o surgery
666900010	Psoriasis, w/o complication, with comorbidity
402000000	Infections of oral cavity, w/o surgery
164500000	Nutritional deficiency, w/o comorbidity, w/o surgery
130600000	Other infectious diseases, w/o complication, w/o comorbidity, w/o surgery
386500010	Ischemic heart disease, w/o complication, with comorbidity, w/o surgery
239200000	Autism & child psychoses
402200000	Inflammation of oral cavity, w/o surgery
475000000	Other infectious diseases of intestines & abdomen, w/o surgery
130600110	Other infectious diseases, with complication, with comorbidity, w/o surgery
712202010	Joint degeneration, localized - knee & L leg, w/o complication, with comorbidity, w/o surgery
666900100	Psoriasis, with complication, w/o comorbidity
667000010	Chronic skin ulcers, w/o complication, with comorbidity, w/o surgery
439800000	Other inflammatory lung diseases, w/o surgery
164400000	Male sex gland disorders, w/o surgery
712211010	Joint degeneration, localized - neck, w/o complication, with comorbidity, w/o surgery
402600000	Other diseases of oral cavity, w/o surgery
667600000	Parasitic skin infection
712000000	Osteoporosis
164700000	Hyperlipidemia, other
712208000	Joint degeneration, localized - back, w/o complication, w/o comorbidity, w/o surgery
779000000	Exposure to infectious diseases
668000001	Malignant neoplasm of skin, major, w/o comorbidity, with surgery, w/o active mgmt
668000011	Malignant neoplasm of skin, major, with comorbidity, with surgery, w/o active mgmt
711400010	Adult rheumatoid arthritis, w/o complication, with comorbidity
780100000	Other preventative & administrative services
779600000	Contraceptive management, w/o surgery

316900010	Migraine headache, w/o complication, with comorbidity
437200000	Viral pneumonia, w/o comorbidity
163000000	Diabetes, w/o complication, w/o comorbidity, w/o surgery
351500000	Glaucoma, w/o complication, w/o surgery
634900000	Conditions associated with menstruation, w/o complication, w/o surgery
399900000	Cardiovascular diseases signs & symptoms
748100000	Chromosomal anomalies
353700000	Other & unspecified diseases & diss of eye & adnexa, w/o surgery
712211000	Joint degeneration, localized - neck, w/o complication, w/o comorbidity, w/o surgery
207300000	Other malignancies of blood & lymphatic systems, w/o surgery, w/o active mgmt
587400000	Infection of lower genitourinary system, not sexually transmitted, w/o complication, w/o comorbidity
712204000	Joint degeneration, localized - hand, wrist & forearm, w/o surgery
240200000	Development disorder
588400000	Non-malignant neoplasm of prostate, w/o surgery
711910000	Major joint inflammation - other, w/o surgery
666900110	Psoriasis, with complication, with comorbidity
555400010	Chronic renal failure, w/o complication, with comorbidity
669007000	Skin trauma, except burn & Op wound - head & face, w/o complication, w/o comorbidity, w/o surgery
164600000	Gout, w/o surgery
315100000	Multiple sclerosis, w/o surgery
353600000	Visual disturbances, w/o complication, w/o surgery
240300000	Somatiform disorder
317700000	Inflammation of non-cranial nerves, except carpal tunnel, w/o complication, w/o surgery
712208110	Joint degeneration, localized - back, with complication, with comorbidity, w/o surgery
668100001	Malignant neoplasm of skin, minor, with surgery
712202000	Joint degeneration, localized - knee & L leg, w/o complication, w/o comorbidity, w/o surgery
587400010	Infection of lower genitourinary system, not sexually transmitted, w/o complication, with comorbidity
668000000	Malignant neoplasm of skin, major, w/o comorbidity, w/o surgery, w/o active mgmt
475300110	Inflammatory bowel disease, with complication, with comorbidity, w/o surgery
589900000	Urological diseases signs & symptoms
635300000	Other diseases of female genital tract, w/o surgery
714801000	Bursitis & tendinitis - foot & ankle, w/o surgery
634000000	Infection of vagina except monilial
714608000	Minor orthopedic trauma - back
669004000	Skin trauma, except burn & Op wound - hand & forearm, w/o complication, w/o surgery
714912000	Other orthopedic disorders - unspecified
780000000	Minor specific procedures not classified elsewhere
389000110	Arterial inflammation, with complication, with comorbidity, w/o surgery
315000000	Inflammation of central nervous system, other, w/o surgery
351700000	Cataract, w/o complication, w/o surgery
386800010	Congestive heart failure, w/o complication, with comorbidity, w/o surgery
711200000	Juvenile rheumatoid arthritis
712212000	Joint degeneration, localized - unspecified, w/o surgery
441500000	Other pulmonary disorders, w/o surgery
473500000	Gastritis &/or duodenitis, w/o complication, w/o comorbidity, w/o surgery
130600100	Other infectious diseases, with complication, w/o comorbidity, w/o surgery
316000010	Cerebral vascular accident, w/o complication, with comorbidity, w/o surgery
669100001	Other skin disorders, with surgery
714803000	Bursitis & tendinitis - thigh, hip & pelvis, w/o surgery
669005000	Skin trauma, except burn & Op wound - elbow & upper arm, w/o complication, w/o surgery
437400110	Bacterial lung infections, with complication, with comorbidity
719908000	Orthopedic signs & symptoms - back
238900000	Mood disorder, bipolar, w/o complication, w/o comorbidity
715101000	Orthopedic deformity - foot & ankle, w/o surgery

162300000	Non-toxic goiter, w/o surgery
387800100	Atrial fibrillation & flutter, with complication, w/o comorbidity, w/o surgery
587400100	Infection of lower genitourinary system, not sexually transmitted, with complication, w/o comorbidity
319900000	Neurological diseases signs & symptoms
437400000	Bacterial lung infections, w/o complication, w/o comorbidity
587400110	Infection of lower genitourinary system, not sexually transmitted, with complication, with comorbidity
668907000	Op wound - head & face, w/o complication, w/o surgery
714601000	Minor orthopedic trauma - foot & ankle
715107000	Orthopedic deformity - head & face, w/o surgery
748700100	Other neonatal diss, perinatal origin, with complication
164300000	Female sex gland disorders, w/o comorbidity, w/o surgery
719902000	Orthopedic signs & symptoms - knee & lower leg
714806000	Bursitis & tendinitis - should, w/o complication, w/o surgery
715108000	Orthopedic deformity - back, w/o surgery
633900000	Monilial infection of vagina (yeast)
634900100	Conditions associated with menstruation, with complication, w/o surgery
669007010	Skin trauma, except burn & Op wound - head & face, w/o complication, with comorbidity, w/o surgery
207800000	Lymphoma, w/o surgery, w/o active mgmt
473500010	Gastritis &/or duodenitis, w/o complication, with comorbidity, w/o surgery
712203010	Joint degeneration, localized - thigh, hip & pelvis, w/o complication, with comorbidity, w/o surgery
316700010	Hereditary & degenerative diseases of central nervous system, other, with comorbidity, w/o surgery
405100000	Trauma to ear/nose/throat, w/o surgery
475300100	Inflammatory bowel disease, with complication, w/o comorbidity, w/o surgery
589200000	Urinary incontinence, w/o comorbidity, w/o surgery
669001000	Skin trauma, except burn & Op wound - foot & ankle, w/o complication, w/o comorbidity, w/o surgery
239100000	Mental disorders, organic & drug-induced
317300000	Inflammation of cranial nerves, w/o surgery
668000010	Malignant neoplasm of skin, major, with comorbidity, w/o surgery, w/o active mgmt
669009000	Skin trauma, except burn & Op wound - trunk, w/o complication, w/o comorbidity, w/o surgery
711912000	Major joint inflammation - unspecified, w/o surgery
712206000	Joint degeneration, localized - shoulder, w/o surgery
387400110	Valvular dis, with complication, with comorbidity, w/o surgery
635600010	Malignant neoplasm of breast, w/o complication, with comorbidity, w/o surgery, w/o active mgmt
667000110	Chronic skin ulcers, with complication, with comorbidity, w/o surgery
719904000	Orthopedic signs & symptoms - hand, wrist & forearm
351900000	Trauma of eye, w/o surgery
719912000	Orthopedic signs & symptoms - unspecified
587800100	Kidney stones, with complication, w/o comorbidity, w/o surgery
669009010	Skin trauma, except burn & Op wound - trunk, w/o complication, with comorbidity, w/o surgery
162100000	Hyper-functioning thyroid gland, w/o surgery
351500100	Glaucoma, with complication, w/o surgery
386600000	Pulmonary heart disease, w/o surgery
748700000	Other neonatal diss, perinatal origin, w/o complication
389000100	Arterial inflammation, with complication, w/o comorbidity, w/o surgery
667000000	Chronic skin ulcers, w/o complication, w/o comorbidity, w/o surgery
711908000	Major joint inflammation - back, w/o surgery
714604000	Minor orthopedic trauma - hand, wrist & forearm
130100110	AIDS, with complication, with comorbidity, w/o surgery
668904000	Op wound - hand & forearm, w/o complication, w/o surgery
669002000	Skin trauma, except burn & Op wound - L leg, w/o complication, w/o comorbidity, w/o surgery
712211110	Joint degeneration, localized - neck, with complication, with comorbidity, w/o surgery
315200010	Epilepsy, w/o complication, with comorbidity, w/o surgery
388300010	Cardiac congenital dis, with comorbidity, w/o surgery
635600000	Malignant neoplasm of breast, w/o complication, w/o comorbidity, w/o surgery, w/o active mgmt

635800100	Non-malignant neoplasm of breast, with complication, w/o surgery
667000011	Chronic skin ulcers, w/o complication, with comorbidity, with surgery
714609000	Minor orthopedic trauma - trunk
386500000	Ischemic heart disease, w/o complication, w/o comorbidity, w/o surgery
165200000	Cystic fibrosis, w/o surgery
238900010	Mood disorder, bipolar, w/o complication, with comorbidity
439700010	Occupational & environmental pulmonary diseases, with comorbidity, w/o surgery
587200000	Sexually transmitted diseases, primary
634700100	Non-malignant neoplasm of female genital tract, with complication, w/o comorbidity, w/o surgery
712201000	Joint degeneration, localized - foot & ankle, w/o surgery
403100001	Tonsillitis, adenoiditis or pharyngitis, w/o complication, w/o comorbidity, with surgery
403100010	Tonsillitis, adenoiditis or pharyngitis, w/o complication, with comorbidity, w/o surgery
403100101	Tonsillitis, adenoiditis, or pharyngitis, with complication, w/o comorbidity, with surgery
403100110	Tonsillitis, adenoiditis, or pharyngitis, with complication, with comorbidity, w/o surgery
402900101	Otitis media, with complication, w/o comorbidity, with minor surgery
402900010	Otitis media, w/o complication, with comorbidity, w/o surgery
402900110	Otitis media, with complication, with comorbidity, w/o surgery
441500001	Other pulmonary disorders, with surgery

Cardiology	
ETG9.4 Code	Cardiology ETG description
386500000	Ischemic heart disease, w/o complication, w/o comorbidity, w/o surgery
386500010	Ischemic heart disease, w/o complication, with comorbidity, w/o surgery
386500100	Ischemic heart disease, with complication, w/o comorbidity, w/o surgery
386500110	Ischemic heart disease, with complication, with comorbidity, w/o surgery
386600000	Pulmonary heart disease, w/o surgery
386800000	Congestive heart failure, w/o complication, w/o comorbidity, w/o surgery
386800010	Congestive heart failure, w/o complication, with comorbidity, w/o surgery
386800100	Congestive heart failure, with complication, w/o comorbidity, w/o surgery
386800110	Congestive heart failure, with complication, with comorbidity, w/o surgery
386900000	Cardiomyopathy, w/o complication, w/o comorbidity, w/o surgery
386900010	Cardiomyopathy, w/o complication, with comorbidity, w/o surgery
386900100	Cardiomyopathy, with complication, w/o comorbidity, w/o surgery
386900110	Cardiomyopathy, with complication, with comorbidity, w/o surgery
387000000	Aortic aneurysm, w/o complication, w/o surgery
387000100	Aortic aneurysm, with complication, w/o surgery
387100000	Heart failure, diastolic, w/o complication, w/o comorbidity, w/o surgery
387100010	Heart failure, diastolic, w/o complication, with comorbidity, w/o surgery
387100100	Heart failure, diastolic, with complication, w/o comorbidity, w/o surgery
387100110	Heart failure, diastolic, with complication, with comorbidity, w/o surgery
387200000	Cardiac infection, w/o comorbidity, w/o surgery
387200010	Cardiac infection, with comorbidity, w/o surgery
387400000	Valvular disorder, w/o complication, w/o comorbidity, w/o surgery
387400010	Valvular disorder, w/o complication, with comorbidity, w/o surgery
387400100	Valvular disorder, with complication, w/o comorbidity, w/o surgery
387400110	Valvular disorder, with complication, with comorbidity, w/o surgery
387600000	Severe heart block, w/o surgery
387800000	Atrial fibrillation & flutter, w/o complication, w/o comorbidity, w/o surgery
387800010	Atrial fibrillation & flutter, w/o complication, with comorbidity, w/o surgery
387800100	Atrial fibrillation & flutter, with complication, w/o comorbidity, w/o surgery
387800110	Atrial fibrillation & flutter, with complication, with comorbidity, w/o surgery
388300000	Cardiac congenital disorder, w/o comorbidity, w/o surgery
388300010	Cardiac congenital disorder, with comorbidity, w/o surgery
388600000	Cardiac trauma, w/o complication, w/o comorbidity, w/o surgery
388600010	Cardiac trauma, w/o complication, with comorbidity, w/o surgery
388600100	Cardiac trauma, with complication, w/o comorbidity, w/o surgery
388600110	Cardiac trauma, with complication, with comorbidity, w/o surgery
388700000	Other cardiac diseases, w/o surgery
389000000	Arterial inflammation, w/o complication, w/o comorbidity, w/o surgery
389000010	Arterial inflammation, w/o complication, with comorbidity, w/o surgery
389000100	Arterial inflammation, with complication, w/o comorbidity, w/o surgery
389000110	Arterial inflammation, with complication, with comorbidity, w/o surgery
389200000	Arterial embolism/thrombosis, w/o surgery
389500000	Non-cerebral, non-coronary atherosclerosis, w/o complication, w/o comorbidity, w/o surgery
389500010	Non-cerebral, non-coronary atherosclerosis, w/o complication, with comorbidity, w/o surgery
389500100	Non-cerebral, non-coronary atherosclerosis, with complication, w/o comorbidity, w/o surgery
389500110	Non-cerebral, non-coronary atherosclerosis, with complication, with comorbidity, w/o surgery
389700000	Arterial aneurysm, except aorta, w/o surgery
389800000	Other non-inflammatory arterial diseases, w/o complication, w/o comorbidity, w/o surgery
389800010	Other non-inflammatory arterial diseases, w/o complication, with comorbidity, w/o surgery

389800100	Other non-inflammatory arterial diseases, with complication, w/o comorbidity, w/o surgery
389800110	Other non-inflammatory arterial diseases, with complication, with comorbidity, w/o surgery
390100000	Arterial trauma, w/o surgery
390300000	Embolism & thrombosis of veins, w/o complication, w/o surgery
390300100	Embolism & thrombosis of veins, with complication, w/o surgery
390400000	Disorders of lymphatic channels, w/o surgery
390500000	Phlebitis & thrombophlebitis of veins, w/o surgery
390600000	Varicose veins of lower extremity, w/o surgery
390700000	Other minor inflammatory diseases of veins, w/o surgery
390900000	Venous trauma, w/o surgery
391000000	Other diseases of veins, w/o surgery

Cardiothoracic Surgery	
ETG9.4 Code	Cardiothoracic Surgery ETG description
386500001	Ischemic heart disease, w/o complication, w/o comorbidity, with angioplasty
386500003	Ischemic heart disease, w/o complication, w/o comorbidity, with CABG
386500004	Ischemic heart disease, w/o complication, w/o comorbidity, with valve surgery
386500005	Ischemic heart disease, w/o complication, w/o comorbidity, with valve surgery & CABG
386500010	Ischemic heart disease, w/o complication, with comorbidity, w/o surgery
386500011	Ischemic heart disease, w/o complication, with comorbidity, with angioplasty
386500013	Ischemic heart disease, w/o complication, with comorbidity, with CABG
386500014	Ischemic heart disease, w/o complication, with comorbidity, with valve surgery
386500015	Ischemic heart disease, w/o complication, with comorbidity, with valve surgery & CABG
386500100	Ischemic heart disease, with complication, w/o comorbidity, w/o surgery
386500101	Ischemic heart disease, with complication, w/o comorbidity, with angioplasty
386500103	Ischemic heart disease, with complication, w/o comorbidity, with CABG
386500104	Ischemic heart disease, with complication, w/o comorbidity, with valve surgery
386500105	Ischemic heart disease, with complication, w/o comorbidity, with valve surgery & CABG
386500110	Ischemic heart disease, with complication, with comorbidity, w/o surgery
386500111	Ischemic heart disease, with complication, with comorbidity, with angioplasty
386500113	Ischemic heart disease, with complication, with comorbidity, with CABG
386500114	Ischemic heart disease, with complication, with comorbidity, with valve surgery
386500115	Ischemic heart disease, with complication, with comorbidity, with valve surgery & CABG
386600001	Pulmonary heart disease, with angioplasty
386600003	Pulmonary heart disease, with CABG
386600004	Pulmonary heart disease, with valve surgery
386600005	Pulmonary heart disease, with valve surgery & CABG
386800001	Congestive heart failure, w/o complication, w/o comorbidity, with angioplasty
386800003	Congestive heart failure, w/o complication, w/o comorbidity, with CABG
386800004	Congestive heart failure, w/o complication, w/o comorbidity, with valve surgery
386800005	Congestive heart failure, w/o complication, w/o comorbidity, with valve surgery & CABG
386800010	Congestive heart failure, w/o complication, with comorbidity, w/o surgery
386800011	Congestive heart failure, w/o complication, with comorbidity, with angioplasty
386800013	Congestive heart failure, w/o complication, with comorbidity, with CABG
386800014	Congestive heart failure, w/o complication, with comorbidity, with valve surgery
386800015	Congestive heart failure, w/o complication, with comorbidity, with valve surgery & CABG
386800100	Congestive heart failure, with complication, w/o comorbidity, w/o surgery
386800101	Congestive heart failure, with complication, w/o comorbidity, with angioplasty
386800103	Congestive heart failure, with complication, w/o comorbidity, with CABG
386800104	Congestive heart failure, with complication, w/o comorbidity, with valve surgery
386800105	Congestive heart failure, with complication, w/o comorbidity, with valve surgery & CABG
386800110	Congestive heart failure, with complication, with comorbidity, w/o surgery
386800111	Congestive heart failure, with complication, with comorbidity, with angioplasty
386800113	Congestive heart failure, with complication, with comorbidity, with CABG
386800114	Congestive heart failure, with complication, with comorbidity, with valve surgery
386800115	Congestive heart failure, with complication, with comorbidity, with valve surgery & CABG
386900001	Cardiomyopathy, w/o complication, w/o comorbidity, with angioplasty
386900003	Cardiomyopathy, w/o complication, w/o comorbidity, with CABG
386900004	Cardiomyopathy, w/o complication, w/o comorbidity, with valve surgery
386900005	Cardiomyopathy, w/o complication, w/o comorbidity, with valve surgery & CABG
386900010	Cardiomyopathy, w/o complication, with comorbidity, w/o surgery
386900011	Cardiomyopathy, w/o complication, with comorbidity, with angioplasty

386900013	Cardiomyopathy, w/o complication, with comorbidity, with CABG
386900014	Cardiomyopathy, w/o complication, with comorbidity, with valve surgery
386900015	Cardiomyopathy, w/o complication, with comorbidity, with valve surgery & CABG
386900100	Cardiomyopathy, with complication, w/o comorbidity, w/o surgery
386900101	Cardiomyopathy, with complication, w/o comorbidity, with angioplasty
386900103	Cardiomyopathy, with complication, w/o comorbidity, with CABG
386900104	Cardiomyopathy, with complication, w/o comorbidity, with valve surgery
386900105	Cardiomyopathy, with complication, w/o comorbidity, with valve surgery & CABG
386900110	Cardiomyopathy, with complication, with comorbidity, w/o surgery
386900111	Cardiomyopathy, with complication, with comorbidity, with angioplasty
386900113	Cardiomyopathy, with complication, with comorbidity, with CABG
386900114	Cardiomyopathy, with complication, with comorbidity, with valve surgery
386900115	Cardiomyopathy, with complication, with comorbidity, with valve surgery & CABG
387000001	Aortic aneurysm, w/o complication, with surgery
387000004	Aortic aneurysm, w/o complication, with valve surgery
387000100	Aortic aneurysm, with complication, w/o surgery
387000101	Aortic aneurysm, with complication, with surgery
387000104	Aortic aneurysm, with complication, with valve surgery
387100001	Heart failure, diastolic, w/o complication, w/o comorbidity, with angioplasty
387100003	Heart failure, diastolic, w/o complication, w/o comorbidity, with CABG
387100004	Heart failure, diastolic, w/o complication, w/o comorbidity, with valve surgery
387100005	Heart failure, diastolic, w/o complication, w/o comorbidity, with valve surgery & CABG
387100010	Heart failure, diastolic, w/o complication, with comorbidity, w/o surgery
387100011	Heart failure, diastolic, w/o complication, with comorbidity, with angioplasty
387100013	Heart failure, diastolic, w/o complication, with comorbidity, with CABG
387100014	Heart failure, diastolic, w/o complication, with comorbidity, with valve surgery
387100015	Heart failure, diastolic, w/o complication, with comorbidity, with valve surgery & CABG
387100100	Heart failure, diastolic, with complication, w/o comorbidity, w/o surgery
387100101	Heart failure, diastolic, with complication, w/o comorbidity, with angioplasty
387100103	Heart failure, diastolic, with complication, w/o comorbidity, with CABG
387100104	Heart failure, diastolic, with complication, w/o comorbidity, with valve surgery
387100105	Heart failure, diastolic, with complication, w/o comorbidity, with valve surgery & CABG
387100110	Heart failure, diastolic, with complication, with comorbidity, w/o surgery
387100111	Heart failure, diastolic, with complication, with comorbidity, with angioplasty
387100113	Heart failure, diastolic, with complication, with comorbidity, with CABG
387100114	Heart failure, diastolic, with complication, with comorbidity, with valve surgery
387100115	Heart failure, diastolic, with complication, with comorbidity, with valve surgery & CABG
387200001	Cardiac infection, w/o comorbidity, with surgery
387200004	Cardiac infection, w/o comorbidity, with valve surgery
387200010	Cardiac infection, with comorbidity, w/o surgery
387200011	Cardiac infection, with comorbidity, with surgery
387200014	Cardiac infection, with comorbidity, with valve surgery
387400001	Valvular disorder, w/o complication, w/o comorbidity, with angioplasty
387400004	Valvular disorder, w/o complication, w/o comorbidity, with valve surgery
387400010	Valvular disorder, w/o complication, with comorbidity, w/o surgery
387400011	Valvular disorder, w/o complication, with comorbidity, with angioplasty
387400014	Valvular disorder, w/o complication, with comorbidity, with valve surgery
387400100	Valvular disorder, with complication, w/o comorbidity, w/o surgery
387400101	Valvular disorder, with complication, w/o comorbidity, with angioplasty
387400104	Valvular disorder, with complication, w/o comorbidity, with valve surgery

387400110	Valvular disorder, with complication, with comorbidity, w/o surgery
387400111	Valvular disorder, with complication, with comorbidity, with angioplasty
387400114	Valvular disorder, with complication, with comorbidity, with valve surgery
387600001	Severe heart block, with surgery
387600004	Severe heart block, with valve surgery
387700010	Other conduction disorders, w/o complication, with comorbidity
387700100	Other conduction disorders, with complication, w/o comorbidity
387700110	Other conduction disorders, with complication, with comorbidity
387800001	Atrial fibrillation & flutter, w/o complication, w/o comorbidity, with surgery
387800010	Atrial fibrillation & flutter, w/o complication, with comorbidity, w/o surgery
387800011	Atrial fibrillation & flutter, w/o complication, with comorbidity, with surgery
387800100	Atrial fibrillation & flutter, with complication, w/o comorbidity, w/o surgery
387800101	Atrial fibrillation & flutter, with complication, w/o comorbidity, with surgery
387800110	Atrial fibrillation & flutter, with complication, with comorbidity, w/o surgery
387800111	Atrial fibrillation & flutter, with complication, with comorbidity, with surgery
388100010	Hypertension, w/o complication, with comorbidity
388100100	Hypertension, with complication, w/o comorbidity
388100110	Hypertension, with complication, with comorbidity
388300001	Cardiac congenital disorder, w/o comorbidity, with angioplasty
388300003	Cardiac congenital disorder, w/o comorbidity, with CABG
388300004	Cardiac congenital disorder, w/o comorbidity, with valve surgery
388300005	Cardiac congenital disorder, w/o comorbidity, with valve surgery & CABG
388300010	Cardiac congenital disorder, with comorbidity, w/o surgery
388300011	Cardiac congenital disorder, with comorbidity, with angioplasty
388300013	Cardiac congenital disorder, with comorbidity, with CABG
388300014	Cardiac congenital disorder, with comorbidity, with valve surgery
388300015	Cardiac congenital disorder, with comorbidity, with valve surgery & CABG
388600001	Cardiac trauma, w/o complication, w/o comorbidity, with surgery
388600010	Cardiac trauma, w/o complication, with comorbidity, w/o surgery
388600011	Cardiac trauma, w/o complication, with comorbidity, with surgery
388600100	Cardiac trauma, with complication, w/o comorbidity, w/o surgery
388600101	Cardiac trauma, with complication, w/o comorbidity, with surgery
388600110	Cardiac trauma, with complication, with comorbidity, w/o surgery
388600111	Cardiac trauma, with complication, with comorbidity, with surgery
388700001	Other cardiac diseases, with angioplasty
388700003	Other cardiac diseases, with CABG
388700004	Other cardiac diseases, with valve surgery
388700005	Other cardiac diseases, with valve surgery & CABG
389000001	Arterial inflammation, w/o complication, w/o comorbidity, with surgery
389000010	Arterial inflammation, w/o complication, with comorbidity, w/o surgery
389000011	Arterial inflammation, w/o complication, with comorbidity, with surgery
389000100	Arterial inflammation, with complication, w/o comorbidity, w/o surgery
389000101	Arterial inflammation, with complication, w/o comorbidity, with surgery
389000110	Arterial inflammation, with complication, with comorbidity, w/o surgery
389000111	Arterial inflammation, with complication, with comorbidity, with surgery
389200001	Arterial embolism/thrombosis, with surgery
389500001	Non-cerebral, non-coronary atherosclerosis, w/o complication, w/o comorbidity, with surgery
389500010	Non-cerebral, non-coronary atherosclerosis, w/o complication, with comorbidity, w/o surgery
389500011	Non-cerebral, non-coronary atherosclerosis, w/o complication, with comorbidity, with surgery
389500100	Non-cerebral, non-coronary atherosclerosis, with complication, w/o comorbidity, w/o surgery

389500101	Non-cerebral, non-coronary atherosclerosis, with complication, w/o comorbidity, with surgery
389500110	Non-cerebral, non-coronary atherosclerosis, with complication, with comorbidity, w/o surgery
389500111	Non-cerebral, non-coronary atherosclerosis, with complication, with comorbidity, with surgery
389700001	Arterial aneurysm, except aorta, with surgery
389800001	Other non-inflammatory arterial diseases, w/o complication, w/o comorbidity, with surgery
389800010	Other non-inflammatory arterial diseases, w/o complication, with comorbidity, w/o surgery
389800011	Other non-inflammatory arterial diseases, w/o complication, with comorbidity, with surgery
389800100	Other non-inflammatory arterial diseases, with complication, w/o comorbidity, w/o surgery
389800101	Other non-inflammatory arterial diseases, with complication, w/o comorbidity, with surgery
389800110	Other non-inflammatory arterial diseases, with complication, with comorbidity, w/o surgery
389800111	Other non-inflammatory arterial diseases, with complication, with comorbidity, with surgery
390100001	Arterial trauma, with surgery
390300001	Embolism & thrombosis of veins, w/o complication, with surgery
390300100	Embolism & thrombosis of veins, with complication, w/o surgery
390300101	Embolism & thrombosis of veins, with complication, with surgery
390400001	Disorders of lymphatic channels, with surgery
390500001	Phlebitis & thrombophlebitis of veins, with surgery
390600001	Varicose veins of lower extremity, with surgery
390700001	Other minor inflammatory diseases of veins, with surgery
390900001	Venous trauma, with surgery
391000001	Other diseases of veins, with surgery

Dermatology	
ETG 9.4 Code	Dermatology ETG Description

714100001	Non-malignant neoplasm of bone & connective tissue, other than head & neck, with surgery
714301001	Joint derangement - foot & ankle, with surgery

714512000	Major trauma, other than fracture or dislocation - unspecified, w/o surgery
748000000	Uncomplicated neonatal management
130200000	HIV sero-positive w/o AIDS, w/o surgery
139900000	Infectious diseases signs & symptoms
164800001	Obesity, w/o complication, with surgery
315200110	Epilepsy, with complication, with comorbidity, w/o surgery
316000011	Cerebral vascular accident, w/o complication, with comorbidity, with surgery
353700001	Other & unspecified diseases & disorders of eye & adnexa, with surgery
389000111	Arterial inflammation, with complication, with comorbidity, with surgery
389800000	Other non-inflammatory arterial diseases, w/o complication, w/o comorbidity, w/o surgery
390600001	Varicose veins of lower extremity, with surgery
390700000	Other minor inflammatory diseases of veins, w/o surgery
403100101	Tonsillitis, adenoiditis, or pharyngitis, with complication, w/o comorbidity, with surgery
403100010	Tonsillitis, adenoiditis or pharyngitis, w/o complication, with comorbidity, w/o surgery
404300002	Malignant neoplasm of ear/nose/throat, w/o surgery, with active mgmt
404500000	Non-malignant neoplasm of ear/nose/throat, w/o surgery
473100000	Infection of stomach & esophagus, w/o comorbidity, w/o surgery
473800110	Ulcer, with complication, with comorbidity, w/o surgery
475300000	Inflammatory bowel disease, w/o complication, w/o comorbidity, w/o surgery
476600100	Hernias, except hiatal, with complication, w/o surgery
522300110	Cholelithiasis, with complication, with comorbidity, w/o surgery
588400001	Non-malignant neoplasm of prostate, with surgery
633500000	Infection of uterus, w/o comorbidity, w/o surgery
634500002	Malignant neoplasm of ovaries, w/o surgery, with active mgmt
634700101	Non-malignant neoplasm of female genital tract, with complication, w/o comorbidity, with surgery
635600001	Malignant neoplasm of breast, w/o complication, w/o comorbidity, with surgery, w/o active mgmt
636000001	Other disorders of breast, with surgery
668903000	Op wound - hip & thigh, w/o complication, w/o surgery
711908001	Major joint inflammation - back, with surgery
714504001	Major trauma, other than fracture or dislocation - hand, wrist & forearm, with surgery
714607000	Minor orthopedic trauma - head & face
715104001	Orthopedic deformity - hand, wrist & forearm, with surgery
162500000	Non-malignant neoplasm of thyroid gland, w/o surgery
164300001	Female sex gland disorders, w/o comorbidity, with surgery
238900110	Mood dis, bipolar, with complication, with comorbidity
239400000	Personality disorder
271100000	Cocaine or amphetamine dependence, w/o comorbidity
314000001	Viral meningitis, with surgery
315400002	Malignant neoplasm of central nervous system, w/o surgery, with active mgmt
351700101	Cataract, with complication, with surgery
386800100	Congestive heart failure, with complication, w/o comorbidity, w/o surgery
389500110	Atherosclerosis, with complication, with comorbidity, w/o surgery
389500100	Atherosclerosis, with complication, w/o comorbidity, w/o surgery
403700001	Other infections of ear/nose/throat, with surgery
440600000	Chest trauma, closed, w/o surgery
473300100	Inflammation of esophagus, with complication, w/o comorbidity, w/o surgery
473300011	Inflammation of esophagus, w/o complication, with comorbidity, with surgery
474400001	Trauma of stomach or esophagus, with surgery
475400012	Malignant neoplasm of large intestine, with comorbidity, w/o surgery, with active mgmt
475800000	Trauma of intestines & abdomen, w/o surgery
477100001	Infection of rectum or anus, with surgery
477800012	Malignant neoplasm of rectum or anus, with comorbidity, w/o surgery, with active mgmt
478000001	Non-malignant neoplasm of rectum or anus, with surgery
522300111	Cholelithiasis, with complication, with comorbidity, with surgery
522300101	Cholelithiasis, with complication, w/o comorbidity, with surgery

588600002	Malignant neoplasm of genitourinary system, except prostate, w/o surgery, with active mgmt
601100110	Pregnancy, with delivery, with complication, with comorbidity, w/o caesarean section
601100010	Pregnancy, with delivery, w/o complication, with comorbidity, w/o caesarean section
633200010	Infection of ovary &/or fallopian tubes, with comorbidity, w/o surgery
635600013	Malignant neoplasm of breast, w/o complication, with comorbidity, with surgery, with active mgmt
668909001	Open wound - trunk, w/o complication, with surgery
668905001	Op wound - elbow & upper arm, w/o complication, with surgery
711104001	Infection of bone & joint - hand, wrist & forearm, with surgery
711902001	Major joint inflammation - knee & lower leg, with surgery
712203100	Joint degeneration, localized - thigh, hip & pelvis, with complication, w/o comorbidity, w/o surgery
712202111	Joint degeneration, localized - knee & L leg, with complication, with comorbidity, with surgery
712904000	Open fracture or dislocation of upper extremity - hand, wrist & forearm
712901000	Open fracture or dislocation of lower extremity - foot & ankle
713105001	Cl fracture or dislocation of upper extremity - elbow & upper arm, w/o comorbidity, with surgery
713101100	Cl fracture or dislocation of lower extremity - foot & ankle, with complication, w/o surgery
714502001	Major trauma, other than fracture or dislocation - knee & L leg, with surgery
714804001	Bursitis & tendinitis - hand, wrist & forearm, with surgery
163100003	Malignant neoplasm of pancreatic gland, with surgery, with active mgmt
164300011	Female sex gland disorders, with comorbidity, with surgery
208900001	Other hematologic diseases, with surgery
239300110	Psychotic & schizophrenic diss, with complication, with comorbidity
314200000	Viral encephalitis, w/o surgery
315300000	Malignant central nervous system metastases, w/o surgery, w/o active mgmt
316000100	Cerebral vascular accident, with complication, w/o comorbidity, w/o surgery
317700101	Inflammation of non-cranial nerves, except carpal tunnel, with complication, with surgery
352400010	Diabetic retinopathy, with comorbidity, w/o surgery
386500111	Ischemic heart disease, with complication, with comorbidity, with angioplasty
387000001	Aortic aneurysm, w/o complication, with surgery
389800110	Other non-inflammatory arterial diseases, with complication, with comorbidity, w/o surgery
390300101	Embolism & thrombosis of veins, with complication, with surgery
402900101	Otitis media, with complication, w/o comorbidity, with minor surgery
402900010	Otitis media, w/o complication, with comorbidity, w/o surgery
404100110	Other inflammatory conditions of ear/nose/throat, with complication, with comorbidity, w/o surgery
404100100	Other inflammatory conditions of ear/nose/throat, with complication, w/o comorbidity, w/o surgery
404100010	Other inflammatory conditions of ear/nose/throat, w/o complication, with comorbidity, w/o surgery
404700001	Congenital & acquired anomalies of ear/nose/throat, with surgery
405100001	Trauma to ear/nose/throat, with surgery
437800000	Pulmonary tuberculosis, w/o comorbidity, w/o surgery
440100013	Malignant neoplasm of pulmonary system, with comorbidity, with surgery, with active mgmt
440100011	Malignant neoplasm of pulmonary system, with comorbidity, with surgery, w/o active mgmt
440100002	Malignant neoplasm of pulmonary system, w/o comorbidity, w/o surgery, with active mgmt
440300000	Non-malignant neoplasm of pulmonary system, w/o surgery
473300001	Inflammation of esophagus, w/o complication, w/o comorbidity, with surgery
475200011	Other inflammation of intestines & abdomen, w/o complication, with comorbidity, with surgery
475500002	Malignant neoplasm of small intestine & abdomen, w/o surgery, with active mgmt
477800000	Malignant neoplasm of rectum or anus, w/o comorbidity, w/o surgery, w/o active mgmt
478000000	Non-malignant neoplasm of rectum or anus, w/o surgery
522400000	Malignant liver metastases, w/o surgery, w/o active mgmt
522500003	Malignant neoplasm of hepatobiliary system, with surgery, with active mgmt
522500002	Malignant neoplasm of hepatobiliary system, w/o surgery, with active mgmt
555400100	Chronic renal failure, with complication, w/o comorbidity
556000100	Nephrotic synd, with complication, w/o comorbidity, w/o surgery

588600001	Malignant neoplasm of genitourinary system, except prostate, with surgery, w/o active mgmt
588800000	Non-malignant neoplasm of genitourinary system, except prostate, w/o surgery
589300000	Male infertility, w/o surgery
634700111	Non-malignant neoplasm of female genital tract, with complication, with comorbidity, with surgery
635800101	Non-malignant neoplasm of breast, with complication, with surgery
667000101	Chronic skin ulcers, with complication, w/o comorbidity, with surgery
668700001	Burns, w/o complication, w/o comorbidity, with surgery
668905101	Op wound - elbow & upper arm, with complication, with surgery
668904101	Open wound - hand & forearm, with complication, with surgery
668904100	Open wound - hand & forearm, with complication, w/o surgery
668903100	Open wound - hip & thigh, with complication, w/o surgery
668903001	Open wound - hip & thigh, w/o complication, with surgery
668902100	Open wound - lower leg, with complication, w/o surgery
668901100	Op wound - foot & ankle, with complication, w/o surgery
669010100	Skin trauma, except burn & open wound - other, with complication, w/o surgery
669007001	Skin trauma, except burn & Op wound - head & face, w/o complication, w/o comorbidity, with surgery
669004001	Skin trauma, except burn & Op wound - hand & forearm, w/o complication, with surgery
711105001	Infection of bone & joint - elbow & upper arm, with surgery
712203101	Joint degeneration, localized - thigh, hip & pelvis, with complication, w/o comorbidity, with surgery
712202101	Joint degeneration, localized - knee & L leg, with complication, w/o comorbidity, with surgery
713107001	Closed fracture or dislocation - head & face, with surgery
713103100	Cl fracture or dislocation - thigh, hip & pelvis, with complication, w/o comorbidity, w/o surgery
714512001	Major trauma, other than fracture or dislocation - unspecified, with surgery
714501001	Major trauma, other than fracture or dislocation - foot & ankle, with surgery
748400000	Mechanical related disorders, antenatal origin

Surgery	
ETG9.2_CD	Surgery ETG description
130100001	AIDS, w/o complication, w/o comorbidity, with surgery
130100011	AIDS, w/o complication, with comorbidity, with surgery
130100101	AIDS, with complication, w/o comorbidity, with surgery
130100111	AIDS, with complication, with comorbidity, with surgery
130200001	HIV sero-positive w/o AIDS, with surgery
130400001	Septicemia, w/o complication, with surgery
130400101	Septicemia, with complication, with surgery
130600001	Other infectious diseases, w/o complication, w/o comorbidity, with surgery
130600011	Other infectious diseases, w/o complication, with comorbidity, with surgery
130600101	Other infectious diseases, with complication, w/o comorbidity, with surgery
130600111	Other infectious diseases, with complication, with comorbidity, with surgery
162000001	Lipidoses (Gaucher's Disease, Fabry Disease, Muclolipidosis I-III), with surgery
162100001	Hyper-functioning thyroid gland, with surgery
162200001	Hypo-functioning thyroid gland, w/o complication, with surgery
162200101	Hypo-functioning thyroid gland, with complication, with surgery
162300001	Non-toxic goiter, with surgery
162400001	Malignant neoplasm of thyroid gland, with surgery, w/o active mgmt
162400003	Malignant neoplasm of thyroid gland, with surgery, with active mgmt
162500001	Non-malignant neoplasm of thyroid gland, with surgery
162600001	Other diseases of thyroid gland, with surgery
163000001	Diabetes, w/o complication, w/o comorbidity, with surgery
163000011	Diabetes, w/o complication, with comorbidity, with surgery

163000101	Diabetes, with complication, w/o comorbidity, with surgery
163000111	Diabetes, with complication, with comorbidity, with surgery
163100001	Malignant neoplasm of pancreatic gland, with surgery, w/o active mgmt
163100003	Malignant neoplasm of pancreatic gland, with surgery, with active mgmt
163200001	Non-malignant neoplasm of pancreas, with surgery
163300001	Malignant neoplasm of pituitary gland, with surgery, w/o active mgmt
163300003	Malignant neoplasm of pituitary gland, with surgery, with active mgmt
163400001	Non-malignant neoplasm of pituitary gland, w/o complication, with surgery
163400101	Non-malignant neoplasm of pituitary gland, with complication, with surgery
163500001	Hyper-functioning adrenal gland, with surgery
163600001	Hypo-functioning adrenal gland, with surgery
163700001	Malignant neoplasm of adrenal gland, with surgery, w/o active mgmt
163700003	Malignant neoplasm of adrenal gland, with surgery, with active mgmt
163800001	Non-malignant neoplasm of adrenal gland, with surgery
163900001	Hyper-functioning parathyroid gland, with surgery
164000001	Hypo-functioning parathyroid gland, with surgery
164100001	Malignant neoplasm of parathyroid gland, with surgery, w/o active mgmt
164100003	Malignant neoplasm of parathyroid gland, with surgery, with active mgmt
164200001	Non-malignant neoplasm of parathyroid gland, with surgery
164300001	Female sex gland disorders, w/o comorbidity, with surgery
164300011	Female sex gland disorders, with comorbidity, with surgery
164400001	Male sex gland disorders, with surgery
164500001	Nutritional deficiency, w/o comorbidity, with surgery
164500011	Nutritional deficiency, with comorbidity, with surgery
164600001	Gout, with surgery
164800001	Obesity, w/o complication, with surgery
164800101	Obesity, with complication, with surgery
165100001	Other metabolic disorders, w/o comorbidity, with surgery
165100011	Other metabolic disorders, with comorbidity, with surgery
165200001	Cystic fibrosis, with surgery
165300001	Other diseases of endocrine glands, with surgery
206900001	Thrombocytopenia, w/o complication, w/o comorbidity, with surgery
206900011	Thrombocytopenia, w/o complication, with comorbidity, with surgery
206900101	Thrombocytopenia, with complication, w/o comorbidity, with surgery
206900111	Thrombocytopenia, with complication, with comorbidity, with surgery
207000001	Hemophilia, with surgery
207200001	Leukemia, with surgery, w/o active mgmt
207200003	Leukemia, with surgery, with active mgmt
207300001	Other malignancies of blood & lymphatic systems, with surgery, w/o active mgmt
207300003	Other malignancies of blood & lymphatic systems, with surgery, with active mgmt
207400001	Sickle-cell anemia, with surgery
207800001	Lymphoma, with surgery, w/o active mgmt
207800003	Lymphoma, with surgery, with active mgmt
207900001	Multiple myeloma, with surgery, w/o active mgmt
207900003	Multiple myeloma, with surgery, with active mgmt
208900001	Other hematologic diseases, with surgery
350100001	Internal eye infection, with surgery
350300001	External eye infection, except conjunctivitis, with surgery
350600001	Inflammatory eye disease, with surgery
350800001	Malignant neoplasm of eye, internal, with surgery, w/o active mgmt
350800003	Malignant neoplasm of eye, internal, with surgery, with active mgmt

350900001	Malignant neoplasm of eye, external, with surgery
351000001	Non-malignant neoplasm of eye, internal, with surgery
351100001	Non-malignant neoplasm of eye, external, with surgery
351500001	Glaucoma, w/o complication, with surgery
351500101	Glaucoma, with complication, with surgery
351700001	Cataract, w/o complication, with surgery
351700101	Cataract, with complication, with surgery
351900001	Trauma of eye, with surgery
352100001	Congenital anomaly of eye, with surgery
352400001	Diabetic retinopathy, w/o comorbidity, with surgery
352400011	Diabetic retinopathy, with comorbidity, with surgery
352600001	Non-diabetic vascular retinopathy, with surgery
352800001	Other vascular disorders of eye except retinopathies, with surgery
353000001	Macular degeneration, with surgery
353200001	Non-macular degeneration, with surgery
353600001	Visual disturbances, w/o complication, with surgery
353600101	Visual disturbances, with complication, with surgery
353700001	Other & unspecified diseases & disorders of eye & adnexa, with surgery
521800001	Cirrhosis, w/o complication, w/o comorbidity, with surgery
521800011	Cirrhosis, w/o complication, with comorbidity, with surgery
521800101	Cirrhosis, with complication, w/o comorbidity, with surgery
521800111	Cirrhosis, with complication, with comorbidity, with surgery
521900001	Acute pancreatitis, with surgery
522000001	Chronic pancreatitis, with surgery
522300001	Cholelithiasis, w/o complication, w/o comorbidity, with surgery
522300011	Cholelithiasis, w/o complication, with comorbidity, with surgery
522300101	Cholelithiasis, with complication, w/o comorbidity, with surgery
522300111	Cholelithiasis, with complication, with comorbidity, with surgery
522400001	Malignant liver metastases, with surgery, w/o active mgmt
522400003	Malignant liver metastases, with surgery, with active mgmt
522500001	Malignant neoplasm of hepatobiliary system, with surgery, w/o active mgmt
522500003	Malignant neoplasm of hepatobiliary system, with surgery, with active mgmt
522700001	Non-malignant neoplasm of hepatobiliary system, with surgery
523000001	Trauma of hepatobiliary system, w/o complication, w/o comorbidity, with surgery
523000011	Trauma of hepatobiliary system, w/o complication, with comorbidity, with surgery
523000101	Trauma of hepatobiliary system, with complication, w/o comorbidity, with surgery
523000111	Trauma of hepatobiliary system, with complication, with comorbidity, with surgery
523200001	Other diseases of hepatobiliary system, with surgery
555600001	Acute renal inflammation, with surgery
555800001	Chronic renal inflammation, with surgery
556000001	Nephrotic syndrome, w/o complication, w/o comorbidity, with surgery
556000011	Nephrotic syndrome, w/o complication, with comorbidity, with surgery
556000101	Nephrotic syndrome, with complication, w/o comorbidity, with surgery
556000111	Nephrotic syndrome, with complication, with comorbidity, with surgery
556100001	Other renal conditions, with surgery
587100001	Infection of upper genitourinary system, with surgery
587800001	Kidney stones, w/o complication, w/o comorbidity, with surgery
587800011	Kidney stones, w/o complication, with comorbidity, with surgery
587800101	Kidney stones, with complication, w/o comorbidity, with surgery
587800111	Kidney stones, with complication, with comorbidity, with surgery
588000001	Inflammation of genitourinary system, except kidney stones, w/o complication, w/o comorbidity, with surgery

588000011	Inflammation of genitourinary system, except kidney stones, w/o complication, with comorbidity, with surgery
588000101	Inflammation of genitourinary system, except kidney stones, with complication, w/o comorbidity, with surgery
588000111	Inflammation of genitourinary system, except kidney stones, with complication, with comorbidity, with surgery
588200001	Malignant neoplasm of prostate, w/o comorbidity, with surgery, w/o active mgmt
588200003	Malignant neoplasm of prostate, w/o comorbidity, with surgery, with active mgmt
588200011	Malignant neoplasm of prostate, with comorbidity, with surgery, w/o active mgmt
588200013	Malignant neoplasm of prostate, with comorbidity, with surgery, with active mgmt
588400001	Non-malignant neoplasm of prostate, with surgery
588600001	Malignant neoplasm of genitourinary system, except prostate, with surgery, w/o active mgmt
588600003	Malignant neoplasm of genitourinary system, except prostate, with surgery, with active mgmt
588800001	Non-malignant neoplasm of genitourinary system, except prostate, with surgery
589000001	Trauma to genitourinary system, with surgery
589200001	Urinary incontinence, w/o comorbidity, with surgery
589200011	Urinary incontinence, with comorbidity, with surgery
589300001	Male infertility, with surgery
589500001	Other diseases of genitourinary system, with surgery
667000001	Chronic skin ulcers, w/o complication, w/o comorbidity, with surgery
667000011	Chronic skin ulcers, w/o complication, with comorbidity, with surgery
667000101	Chronic skin ulcers, with complication, w/o comorbidity, with surgery
667000111	Chronic skin ulcers, with complication, with comorbidity, with surgery
668000001	Malignant neoplasm of skin, major, w/o comorbidity, with surgery, w/o active mgmt
668000003	Malignant neoplasm of skin, major, w/o comorbidity, with surgery, with active mgmt
668000011	Malignant neoplasm of skin, major, with comorbidity, with surgery, w/o active mgmt
668000013	Malignant neoplasm of skin, major, with comorbidity, with surgery, with active mgmt
668100001	Malignant neoplasm of skin, minor, with surgery
668200001	Non-malignant neoplasm of skin, w/o complication, with surgery
668200101	Non-malignant neoplasm of skin, with complication, with surgery
668700001	Burns, w/o complication, w/o comorbidity, with surgery
668700011	Burns, w/o complication, with comorbidity, with surgery
668700101	Burns, with complication, w/o comorbidity, with surgery
668700111	Burns, with complication, with comorbidity, with surgery
668901001	Open wound - foot & ankle, w/o complication, with surgery
668901101	Open wound - foot & ankle, with complication, with surgery
668902001	Open wound - lower leg, w/o complication, with surgery
668902101	Open wound - lower leg, with complication, with surgery
668903001	Open wound - hip & thigh, w/o complication, with surgery
668903101	Open wound - hip & thigh, with complication, with surgery
668904001	Open wound - hand & forearm, w/o complication, with surgery
668904101	Open wound - hand & forearm, with complication, with surgery
668905001	Open wound - elbow & upper arm, w/o complication, with surgery
668905101	Open wound - elbow & upper arm, with complication, with surgery
668906001	Open wound - shoulder, w/o complication, with surgery
668906101	Open wound - shoulder, with complication, with surgery
668907001	Open wound - head & face, w/o complication, with surgery
668907101	Open wound - head & face, with complication, with surgery

Appendix F: ETG adjuster

The ETG adjuster is one of the variables we case-mix adjust ETGs by and represents a roll-up of ETGs within a base ETG condition to allow for a greater chance of creating a comparative cell of at least 22 episodes. We found that when only using the base ETG condition, there was not a homogeneous group of members for providers to be compared against.

We reviewed different scenarios of bundling various ETGs together and determined that we should keep non-surgical and surgical ETGs separate and grouped together by similar body system/part, treatments that would be expected within the condition, progression of disease within a condition and the dollars associated with that group of ETGs. So as not to penalize a provider with more intense services, we also separated ETGs “with complication” from ETGs “without complication.” After a review of the ETG descriptions and the “complication” flag that is written out by the Symmetry software, we determined that complications were not necessarily the result of a physician, but rather the type of presenting symptoms or level of treatment necessary. For example, for ETGs that describe a burn, the complication flag is set based on whether the burn itself presented as 1st, 2nd, or 3rd degree. We did not adjust the ETG grouping based on comorbidity because we are already using the severity indicator on the episode based on Symmetry as its own adjuster for all ETG combinations.

For application to the physician’s review, if a physician is assigned a particular ETG, he/she will be compared to the normative value created based on their ETG within that grouping. For example, ETG 38650010 is within a group with an adjuster grouping code of 10, so all the ETGs within that base of 3865 and an adjustment code of 10 will create a norm for which the physician’s average dollar for ETG 38650010 is compared.

ETG	ETG DESCRIPTION	ETG ADJ CODE
386500100	Isch hrt dis, w comp, wo comorb, wo surg	10
386500110	Isch hrt dis, w comp, w comorb, wo surg	10
